Step 1 — Battery

- Slide the battery release latch into the unlock position.
  - Remove the battery from the system.
Step 2 — Keyboard Trim

- Using a plastic scribe, pry under the keyboard trim to release it from the computer.
  - Work your way around the sides and bottom edge of the keyboard trim.
    - Lift up to remove the keyboard trim from the unit.

Step 3 — KeyBoard

- Remove the screws securing the keyboard in place.
  - Starting from the bottom of the keyboard, separate the keyboard from the system and turn the keyboard over.
    - Disconnect the keyboard data cable from the system board.

Step 4

- Remove the keyboard.
  - Peel back the adhesive tape securing the keyboard data cable to the back of the keyboard.
    - Disconnect the keyboard data cable from the back of the keyboard.
