

Dell VRP100 Cover Replacement

How to take the cover off the Dell VRP100 virtual reality headset to access the internal components.

Written By: Marco Salazar

INTRODUCTION

This replacement guide will show you how to replace the cover panel on your Dell VRP100 headset. With the right tools, this replacement is very simple, and is the basis to replacing many more components of your headset.

TOOLS:

- [Phillips #000 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Cover Panel

- Remove the black foam padding by peeling away slowly.
- Remove the front and back padding from the headset by peeling away slowly.

Step 2

- Remove the six 5.5mm PH000 screws from the cover by rotating counter-clockwise.
- ☑ Cover panel may need to be pushed in before inserting screws.

Step 3

- Remove the cover using one of the plastic opening tools, and then carefully pull it from the casing.

Step 4

- Remove the six 5.5mm PH000 screws from the cover by rotating counter-clockwise.
- Carefully remove the lens and motherboard assembly from the white casing.

To reassemble your device, follow these instructions in reverse order.
