## 🔧 TOOLS:

- Phillips #0 Screwdriver (1)

Step 1 — Remove the battery
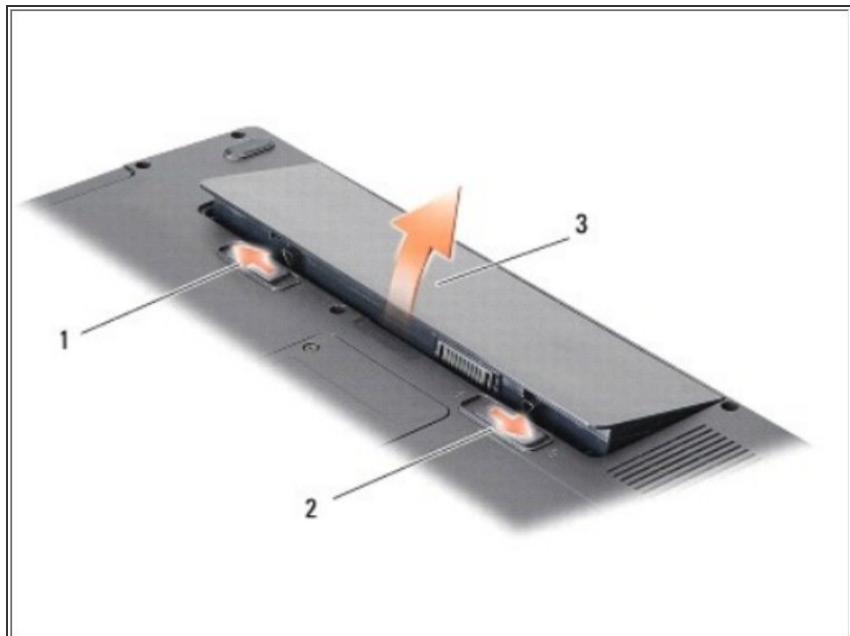

- Unlock the battery by sliding the battery-lock latch towards the outer edge.
  - Slide the battery-bay release latch and hold it.
    - Remove the battery from the battery bay.
- 📌 If this is all you are doing Follow Step In Reverse if not Go to Next Step.

Step 2 — Remove the Module Cover
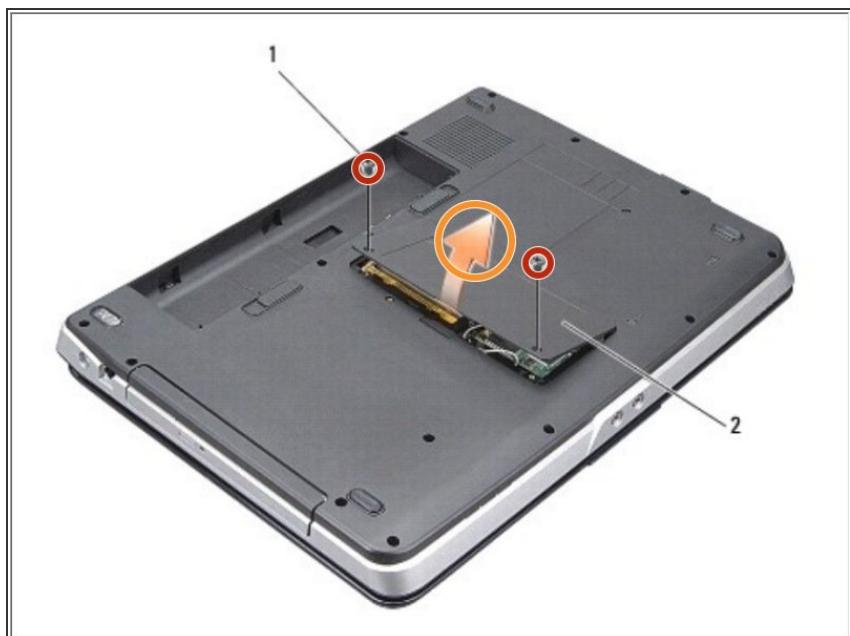

- Remove the two screws from the module cover.
  - Lift the module cover away from the computer.
- 📌 If this is all you are doing Follow Step In Reverse if not Go to Next Step.
