Step 5

- Disconnect the wire that is connected to the wireless card with a plastic iFixit opening tool by lifting up slowly, then pulling the wires aside.

Step 6

- Use a **PH00** size screwdriver to remove the 8 screws that secure the battery.
 - Six 3mm screws.
 - Two 5mm screws.

Step 7

- Insert a plastic iFixit opening tool in between the port and the wires to remove the battery cable.

Step 8

- After removing the battery, start to remove the wireless wire and making it through the other wires connected under the battery.

Step 9

- Remove the screws with a PH1 size screwdriver.
- Each side of the brackets that are holding the screen down are going to have two 3mm screws in each side.

Step 10

- Open the laptop by separating the screen from the actual laptop and take it apart.
