

Dell XPS M1730 Memory Replacement

Written By: Johnathan Hammond

INTRODUCTION

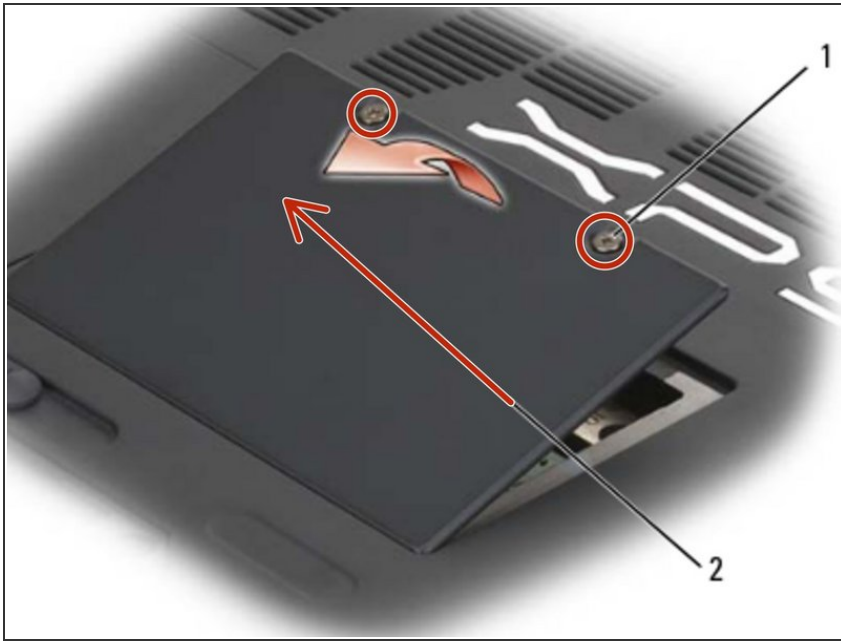

Replace Memory

TOOLS:

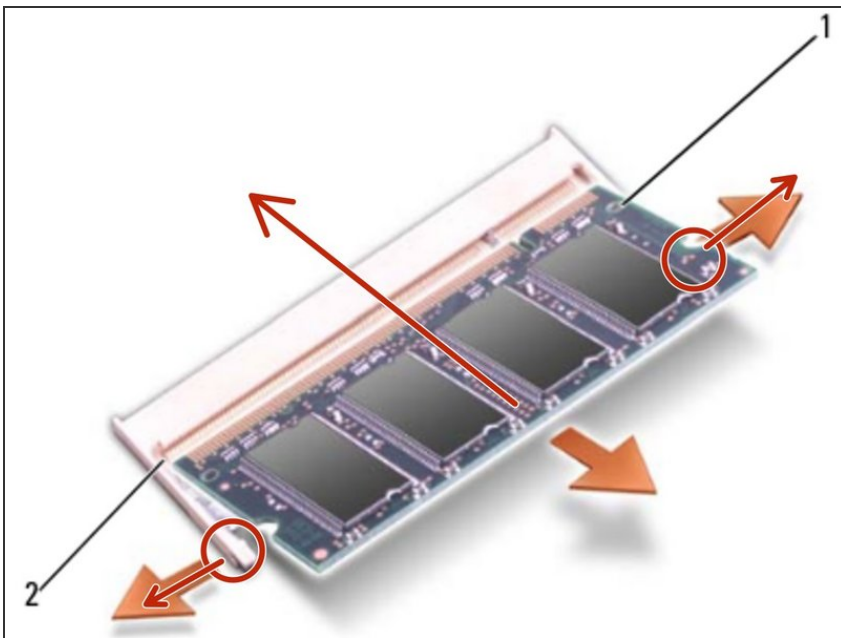

- [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Remove memory Cover

- Turn the computer over, loosen the captive screws on the memory module cover, and then remove the cover.

Step 2 — Remove Memory

- Use your fingertips to carefully spread apart the securing clips on each end of the memory module connector until the module pops up.
- Remove the module from the connector.

To reassemble your device, follow these instructions in reverse order.
