

Desktop PC Right Panel Replacement

This guide will show the proper steps to remove the right panel of a desktop computer case. The right panel is located on the right side when facing the front of the computer.

Written By: David Lennon

INTRODUCTION

Removing the right panel of a desktop computer is an important skill to have for repair and troubleshooting purposes. The right panel must be removed before some repairs can take place. In addition, computers with heating problems could benefit from having the right panel removed.

TOOLS:

- Phillips #2 Screwdriver (1)

Step 1 — Right Panel

- Remove two Phillips #2 head 5mm screws from the back side of the computer case.

Step 2

- Next, remove the side panel of the computer case to allow access into the computer.

To reassemble your device, follow these instructions in reverse order.
