

# Dewalt DCF885 Motor Assembly Replacement

This guide will instruct you on how to remove the motor assembly.

Written By: Will

 **TOOLS:**

- T10 Torx Screwdriver (1)

## Step 1 — Battery

- Press the battery release button at the top of the battery.

## Step 2

- Pull the battery away from the tool.

## Step 3 — Motor Assembly

- Remove the eight 18 mm Torx Security #10 screws.

## Step 4

- Separate the two halves of the outer case. Set the empty side down and out of the way.

## Step 5

- Disconnect the connector from the motor assembly.

## Step 6

- Pull the motor away from the brush assembly.

To reassemble your device, follow these instructions in reverse order.
