INTRODUCTION

We are going to teach you how to remove the external cover on the Digital2 Platinum Pad 9 tablet. Getting the cover off is a little tricky and takes a bit of force.

TOOLS:

- [iFixit Opening Tools](#) (1)
-

Step 1 — External Cover

- Take the plastic opening tool and insert it into the crease between the screen and the plastic casing and press down.

Step 2

- After inserting the plastic opening tool, run it around the device a few times to loosen the external cover.

Step 3

- Once you've gone around a few times a corner will pop up, insert the opening tool there and repeat step 2 with slightly more pressure. Do this until every section of the backing has popped up.
- Then just remove the backing.

To reassemble your device, follow these instructions in reverse order.
