INTRODUCTION

Before starting, please:

- make sure nothing is attached (such as AC adapter, USB, VGA, audio jack).
- remove any inserted SD card.

⚙ PARTS:

- Phillips #00 Screwdriver (1)
- Tweezers (1)

Step 1 — Remove the Battery

- Slide the switch on the bottom of the laptop until the battery pops out.

- Once the battery pops out, you can remove it.

## Step 2 — Remove Rear Rubber Feet

- Using forceps or tweezers, remove the two rear rubber feet to expose two hidden screws.

Step 3 — Remove Screws

- Using a Phillips head #00 Screwdriver, remove a total of 12 screws:
  - 10 screws in the battery compartment.
    - size ph#00, approximately 3 mm long
  - 2 screws under the rubber feet previously removed
    - Size ph#00, approximately 4.5 mm long

Step 4

- Starting where the body of the laptop and the laptop screen meet, pry apart the lower case from the rest of the laptop.

- (i) The case is easier to remove when separating in a clockwise motion, as seen in the pictures.

To reassemble your device, follow these instructions in reverse order.
