

Disassembling HP Envy 17-3070NR Motherboard Assembly

Prerequisite Only guide for accessing motherboard.

Written By: Jasper Lewin

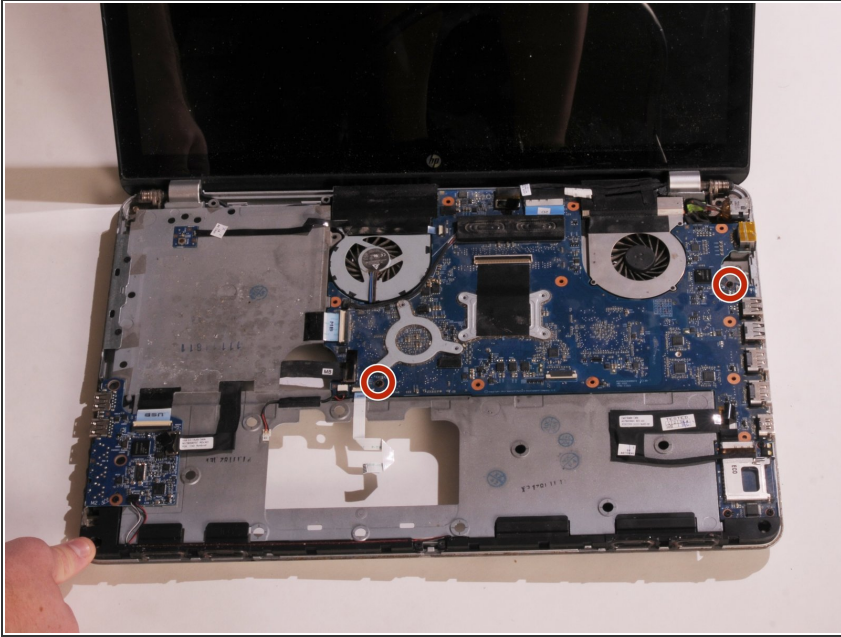

TOOLS:

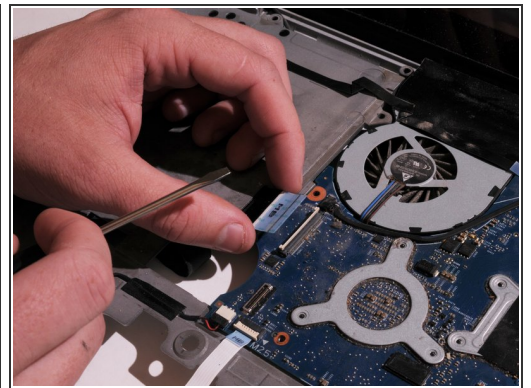

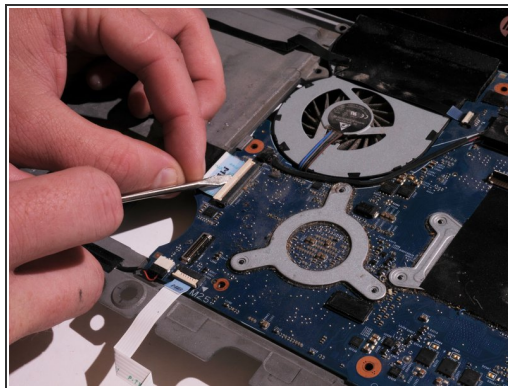

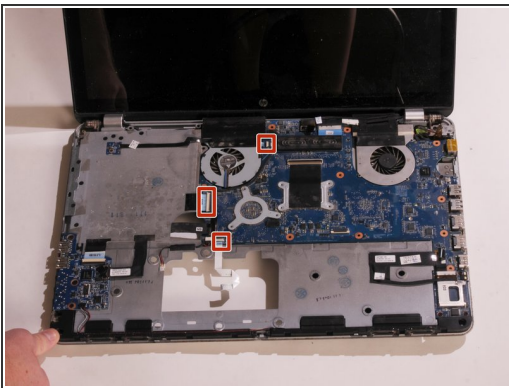

- [Phillips #2 Screwdriver](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Disassembling HP Envy 17-3070NR Motherboard Assembly

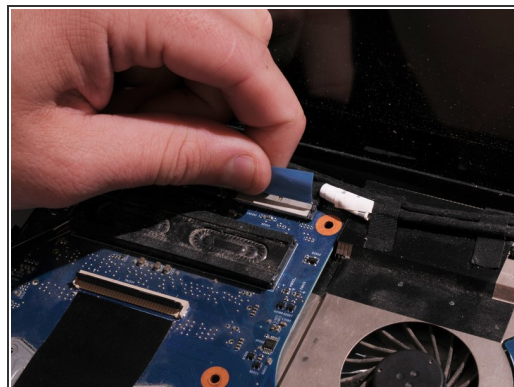

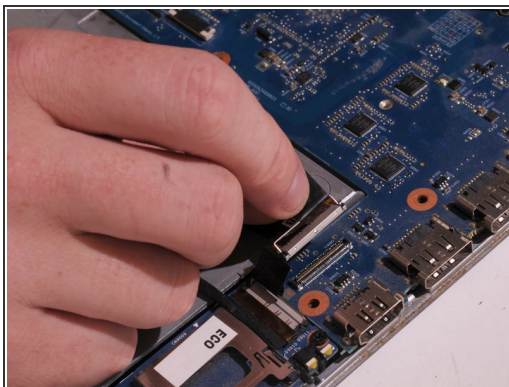

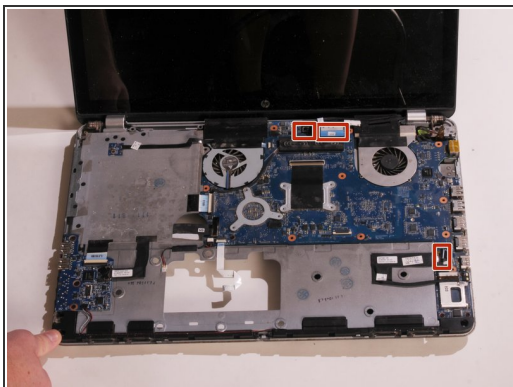

- Remove the two 4.5mm Phillips screws from the system board

Step 2

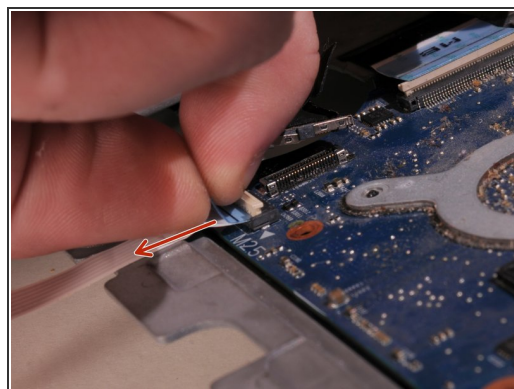

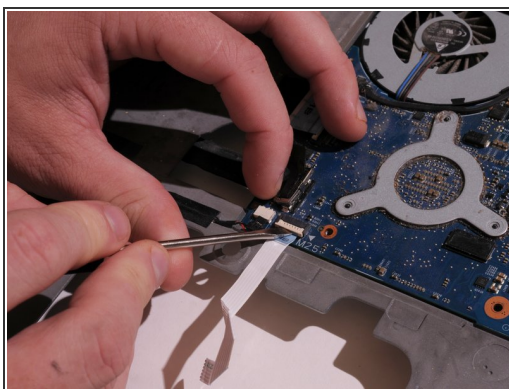

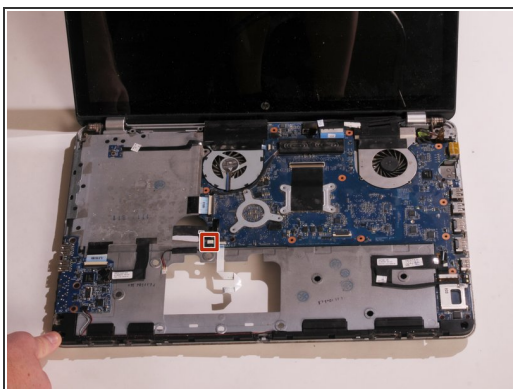

- Disconnect three cables by lifting a white clamp with a Flathead screwdriver and pulling on the blue tab.

Step 3

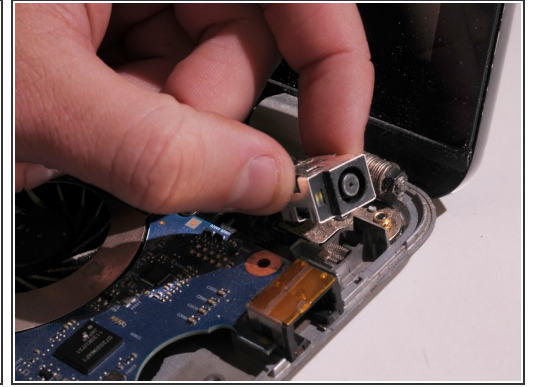

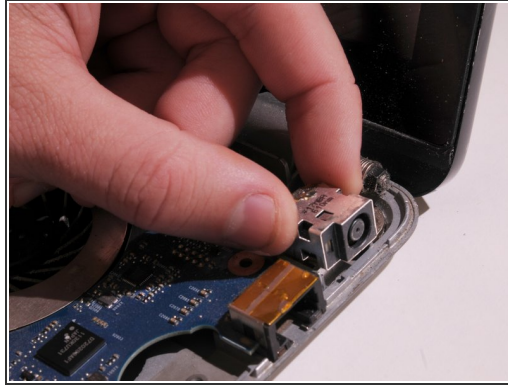

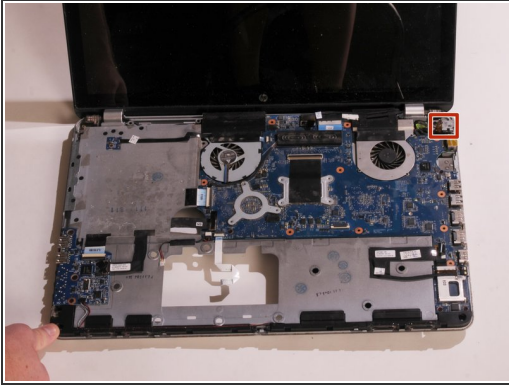

- Disconnect three cables by pulling upward on black or blue tabs connected to them.

Step 4

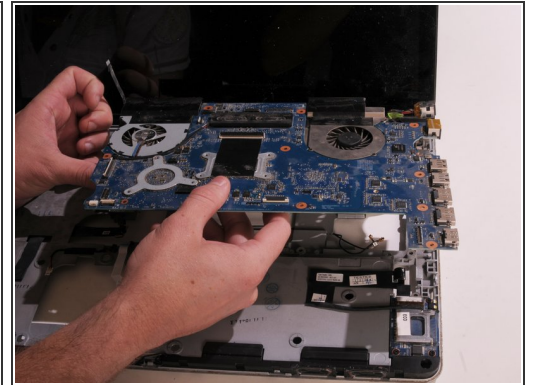

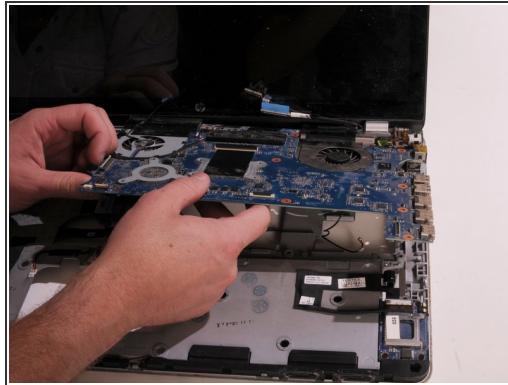

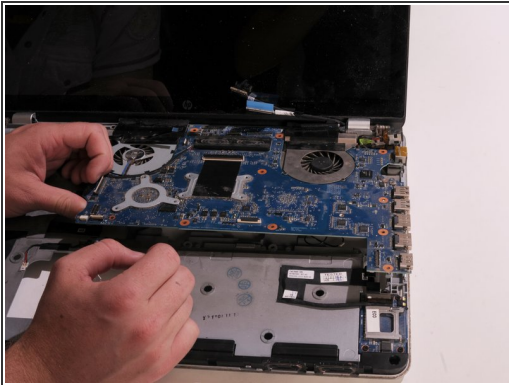

- Disconnect cable by using a Flathead screwdriver to gently pry it off the black connector towards you.

Step 5

- Lift up the power connector from the clip.

Step 6

- Carefully lift up motherboard from the main assembly.

To reassemble your device, follow these instructions in reverse order.
