Disassembling Kodak Advantix F350 Front Cover

This guide demonstrates how to remove the front and back cover from the camera.

Written By: David Cottrell

🔧 TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)

Step 1 — Back Cover

- Turn off the camera.
  - Locate the power switch on the front of the camera below the camera lens.
  - Slide the switch to the off position.

Step 2

- Locate the 3 screws that hold the back cover to the camera.
  - One screw is located on the film opener side of the camera.
  - The other screws are located on the opposite side of the camera.

Step 3

- Use the Phillips #00 Precision Screwdriver and remove the screws on the back cover.
Step 4

- Open the film door to remove the back cover.
  - Slide the film door lever to the left until the film door opens.
Step 5

- Use a plastic opening tool to pry the case open until a small gap is present.
  - Repeat this process at the top and bottom of the film door to loosen it.

Step 6

- Grab the top and bottom of the case firmly as shown.
  - Gently remove the back of the camera case with a slight twisting motion.

Step 7 — Front Cover

- Locate the 3 screws on the camera that hold the front cover of the camera to the camera body.

  - The first 2 are located on the bottom of the camera.

  - The last screw is located behind the flash module.

    - Turn the camera on, and raise the flash module to locate the flash module screw.
Step 8

- Remove the 2 screws at the base of the camera housing.
  - Use the Phillips #00 Precision Screwdriver and remove the screws.
  - Repeat this process for the screw behind the flash module.

Step 9

- Remove the screw located under the flash module using the Phillips #00 Precision Screwdriver.
