

Disassembling Motorola V180 Connector ribbon/inside screen cover

Written By: Tyler Knisley

INTRODUCTION

Disassembling top half to get to connector ribbon, inside screen, and speaker.

TOOLS:

- [Soldering Iron](#) (1)
 - [T6 Torx Screwdriver](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Connector ribbon/inside screen cover

- Pull at top of faceplate, and it will pop off.

Step 2

- Unscrew four screws on front cover.

Step 3

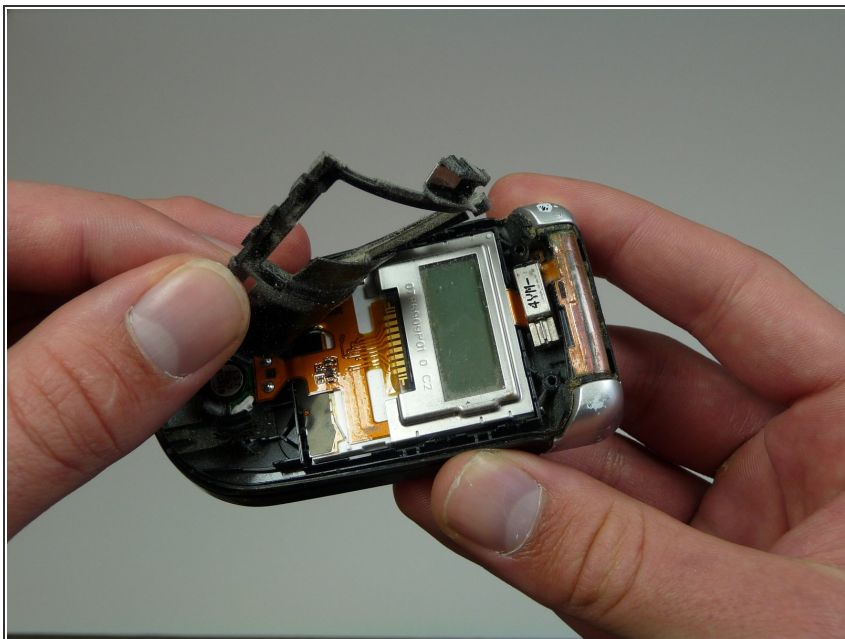

- Slide out metallic silver cover.
- ⓘ This piece is wedged in tight. Try to slide out one hook at a time, instead of both simultaneously.

Step 4

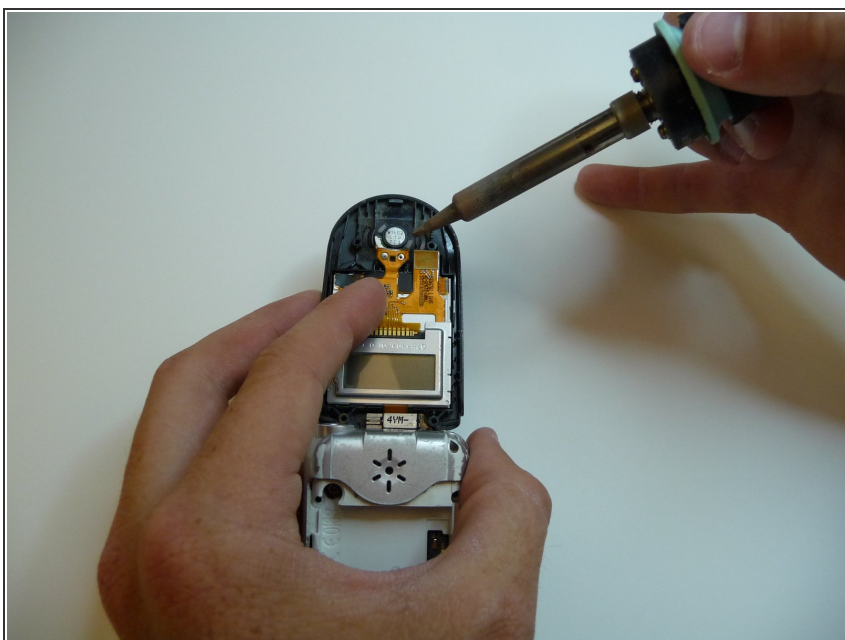

- Use a tool to wedge in between the silver and black parts on the cover.
- Silver part should now snap off.

Step 5

- Black rubber part may now be easily removed.

Step 6

- Use a soldering iron to disconnect the connector ribbon from the phone.

To reassemble your device, follow these instructions in reverse order.
