

Disassembling Motorola i850 Keypad

Written By: Tony Chen

INTRODUCTION

A procedure in replacing the keypad of the device.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
 - [Tweezers](#) (1)
-

Step 1 — Disassembling Motorola i850 Back Cover

- Use your thumb to slide the back cover locker away from the antenna.

Step 2

- Slide the back cover towards the antenna while lifting the cover away from the phone.

Step 3 — Battery

- Place your thumb on the indicated corner while stabilizing the phone and the upper portion of the battery with your forefinger.

Step 4

- Lift the battery out of the phone while pushing it towards the antenna.

Step 5 — Keypad

- Once battery is removed, untighten the screws located near the edges of the device with a Phillips #00 Screwdriver.

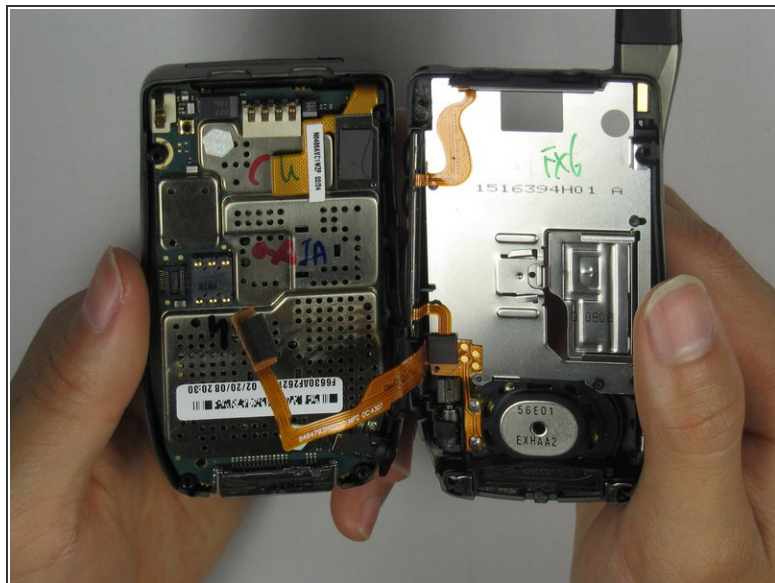

Step 6

- Grip the device firmly with both hands and carefully open the device.

⚠ Warning: Interior hardware inside the device can be easily damaged.

Step 7

- Carefully remove the hardware by gripping the side of the hardware attachment with a tweezer.

Step 8

- Carefully grip the side of the hardware attachment with a tweezer and detach from device.

Step 9

- Place the back of the device on your hand and flip it over with the other hand.
 - Carefully lift the device to remove interior hardware.
- i** The structure of the keypad should easily be loose from flipping the device.

Step 10

- Carefully remove the keypad by gripping on the side of the plastic with a tweezer.

! **WARNING:** The plastic keypad is sensitive and can be easily damaged.

To reassemble your device, follow these instructions in reverse order.
