

# Disassembling Nokia 2366i Side Buttons

Written By: Jonathan Newman

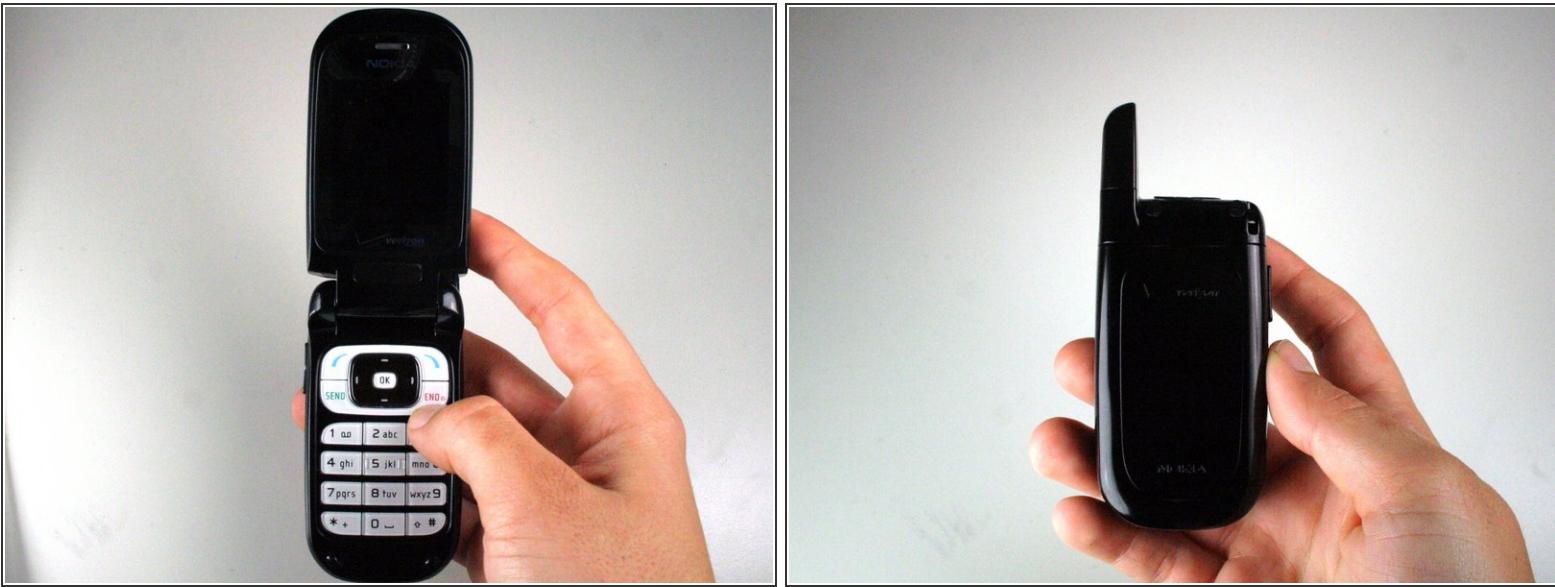

## INTRODUCTION

Removing the side buttons on the phone.

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [Spudger](#) (1)
- [T6 Torx Screwdriver](#) (1)

## Step 1 — Battery

- Turn off the phone.
- *i* Position the phone so that the back side is in view.

## Step 2

- Apply pressure on the cover while simultaneously sliding the cover downward.
- Remove the back battery cover.

## Step 3

- Insert the spudger between the base of the phone and the phone battery.
- Position the phone so that the battery won't fall out of the phone.
- Carefully lift the battery out of the phone.

*(i)* The battery lifts out of the phone easily.

## Step 4 — Rear Case

- Use a Phillips #00 screwdriver or your fingers to remove the rubber tabs at top back of the phone.

## Step 5

- Remove four 5mm screws from the back of the phone using a T6 Torx screwdriver:
  - 2 screws at the bottom
  - 2 screws at the top

## Step 6

*(i)* Rotate the phone clockwise so the edge is facing you.

- Insert the spudger in tabs between the outer casing and the inside frame.
- Slide the spudger upwards.

*(i)* This will remove the rear case of the phone.

## Step 7

- The phone should now be in two different sections.
  - 1) The rear case of the phone.
  - 2) The motherboard and the rest of the phone.

## Step 8 — Motherboard

- Use the spudger to lift off the yellow clip near the top right corner of the motherboard.

## Step 9

*(i)* Rotate the phone counterclockwise so that the edge is facing you.

- Use the spudger to lift the motherboard out of the base of the phone.
- Remove the motherboard from the base of the phone.

## Step 10 — Side Buttons

- Use the spudger to pull off the top orange chip attached to the white tab.

## Step 11

- Lightly pull up on the white tab to remove the orange tab from the logic board.
- *(i)* Don't worry about the glue on the bottom orange tab. It's only there to keep the side button in place.

To reassemble your device, follow these instructions in reverse order.
