 **TOOLS:**

- [Phillips #0 Screwdriver \(1\)](#)
- [iFixit Opening Tools \(1\)](#)

Step 1 — Battery Casing

- Remove the back cover by sliding it off.
- Remove the 3 AAA batteries.

Step 2

- Unscrew the nine exterior screws on the back panel using a PH0-size Philips-head screwdriver.
- NOTE: A larger screwdriver head and more force may be required for damaged screws.
- Remove the triangular end piece by pulling it straight off.

Step 3

- Remove the colored grill by sliding it off in the direction of the removed end piece.
- Pry off the back battery panel with the plastic opening tool.
- NOTE: Be careful to avoid tearing any wires.

To reassemble your device, follow these instructions in reverse order.
