

# Disassembling Polaroid a520 Lens

Removing the Lens from the camera for replacement.

Written By: Dani

 **TOOLS:**

- [Phillips #00 Screwdriver](#) (1)
- [Spudger](#) (1)

## Step 1 — Disassembling Polaroid a520 Battery

- Locate the battery cover on the bottom of the camera.

## Step 2

- Place your thumb on the battery cover and push towards the arrow. The cover will release and pop open.

## Step 3

- Remove the batteries from the camera.

## Step 4 — Disassembling Polaroid a520 Casing

- Unscrew and remove four (3mm) screws on the right side of the camera. This will release the front and back casings.

## Step 5

- Use your nail or a flat object to pry up the edge of the front casing. Push the casing up and back.
- Repeat this step for the back casing.

## Step 6 — Disassembling Polaroid a520 LCD Screen

- Locate the black plastic strip under the screen above the white plastic strip.

## Step 7

- Pull up both sides of the black piece up about a mm.
- ⚠ The black plastic piece is not meant to come all the way off, just enough to release the screen.
- Once the piece is lifted carefully slide the screen out of the slot.

## Step 8 — Logic Board

- Unscrew and remove the four (6 mm) screws on the inside casing.

## Step 9

- Pull the inner casing off of the camera.

## Step 10

- Unscrew and remove the four (4mm) screws from the logic board.

## Step 11

- Use a spudger to pry up all four sides of the logic board and slide it out of the camera.

## Step 12 — Lens

- Unscrew and remove the two (5mm) screws from the logic board to the far left.

## Step 13

- Locate the black plastic piece behind the lens.

## Step 14

- Similar to the LCD screen, pull the black piece up about a mm and it will release the lens.

**⚠** The piece will not come all the way off; only enough to release the lens.

- Once the black piece is lifted slide the ribbon out to release the lens.

To reassemble your device, follow these instructions in reverse order.
