INTRODUCTION

This is the first few steps for disassembling the DVD player.

TOOLS:

- [Phillips #2 Screwdriver](#) (1)
-

Step 1 — Outer Cover & Faceplate

- Open the tray by pressing the eject button
- Remove the DVD tray faceplate by pushing the faceplate up off of the tray.

Step 2

- Press the eject button to insert the tray
- After the tray is closed unplug DVD player

Step 3

- Unscrew the 3 screws in the back.

Step 4

- Pull the outer case upward and then towards you.

Step 5

- There are six symmetrically placed tabs holding in the front faceplate. Unhook these six tabs to loosen the faceplate.

Step 6

- Pull off front faceplate. This may take a couple of tries to get all six tabs unhooked simultaneously.

To reassemble your device, follow these instructions in reverse order.
