## TOOLS:

- [Phillips #1 Screwdriver](#) (1)
  - [New Item](#) (1)
-

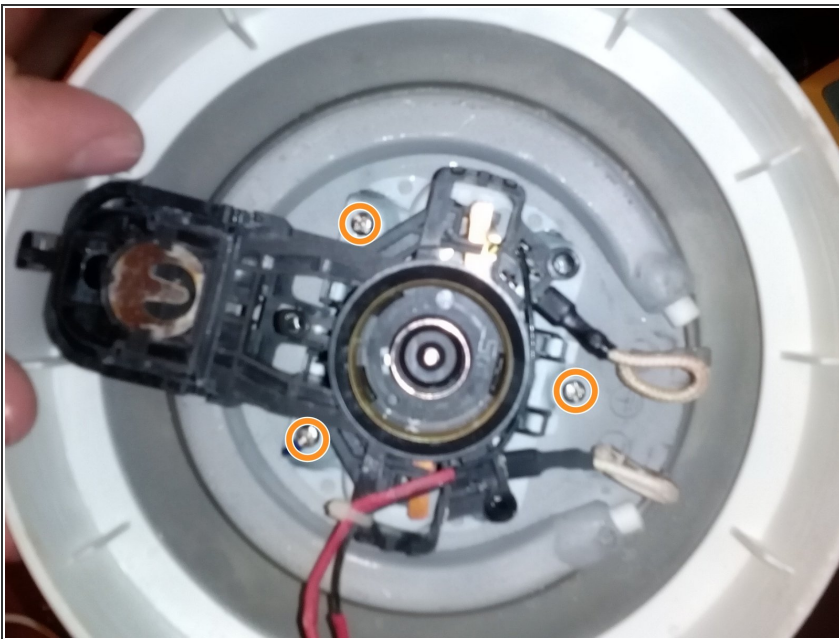

## Step 1 — Removal of the soil

⚠ Pay attention to voltage free!

- Loosen the three screws in the bottom with a 6mm spanner bit (are identical).
- The ground is now falling out.

## Step 2

- The electronics are now accessible.
- If this is to be disassembled, remove the three marked screws with a PH1 screwdriver.

Repeat the steps in order to reassemble your device.
