Droid Ultra XT1080 Power Button Replacement

How to replace a Motorola Droid Ultra power button.

Written By: knoyes

INTRODUCTION
This guide will show you how to properly replace the power button on your Motorola Droid Ultra XT 1080

🔧 TOOLS:

- iFixit Opening Tools (1)
- Spudger (1)
- T5 Torx Screwdriver (1)
- T4 Torx Screwdriver (1)

Step 1 — Power Button

- Gently remove the SIM card tray from the device using a spudger.

Step 2

- After SIM card removal press the spudger between the plastic case and the frame until you hear a snap.

- Work your way around the device until all the clips are released.

- ⚠ Be gentle while doing this so you don't crack or break the plastic.

Step 3

- Remove the five screws on top of the device with a T5 Torx.

- Remove the single screw holding the camera with a T4 Torx.

- Remove the two screws on the bottom of the device with a T5 Torx.

Step 4

- Once the screws are removed, use a nylon spudger and lift up on the two plastic pieces that were secured by the screws.
Step 5

- Remove the four T5 Torx screws securing the motherboard.

Step 6

- Gently pry the motherboard out of the frame using the plastic opening tool.

Step 7

- Once motherboard is removed you have gained access to the power button.

- Gently, using a pair of angled tweezers pull on the power button to remove it.

To reassemble your device, follow these instructions in reverse order.
