

Dual-sided Vanity Mirror Cover Replacement

Fix a broken vanity mirror by replacing the mirror piece with a new one.

Written By: Sarina Horn

INTRODUCTION

If the mirror of the dual-sided magnifying vanity has broken, it can be easily replaced with a new piece. This prevents having to throw the whole mirror away, which saves money and prevents waste. Use this guide to remove the broken mirror cover and replace it with a new one.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
-

Step 1 — mirror cover

- Measure the length of the mirror for purchasing a new replacement part.

Step 2

- Using the Phillips head screwdriver, unscrew the screw on the side of the mirror.
- ⓘ The screws are very small and can be easily lost. Be aware while loosening them.

Step 3

- Remove the other screw from the opposite side of the mirror.

Step 4

- Lift off the mirror piece by pulling up at the sides.

- ⓘ Tilt the mirror upward.

Step 5

- Remove the bolt on the left side connecting the second mirror piece to the stand by twisting it counter-clockwise.

Step 6

- Remove the larger bolt on the opposite side by twisting it counter-clockwise.

Step 7

- Take off the mirror piece

To reassemble your mirror with a new mirror piece, follow these instructions in reverse order.
