

# Eco X Gear Voice Coil Replacement

Replace a defective voice coil in the Eco X Gear speaker to make sure your speaker is producing sound.

Written By: James Lipsett

## INTRODUCTION

You will need a phillips head screw driver and needle nose pliers to complete this task. Before opening the device, ensure that there is no power to avoid damaging the electronics or harming yourself.

### TOOLS:

- [Small Needle Nose Pliers](#) (1)
  - [Phillips #1 Screwdriver](#) (1)
-

## Step 1 — Frame

- Disconnect any power source and/or turn off device.

## Step 2

- Remove the 15 rubber plugs from the cavities using needle nose pliers.

### Step 3

- Use a phillips head screwdriver to remove the fifteen 6.4mm screws.

### Step 4

- Carefully separate the two sections of the frame.
- ⚠ Wires still connect the two sections. Be cautious to avoid damaging the wires, terminals, and electronics.

## Step 5 — Voice Coil

- Disconnect the wiring to improve accessibility to the cones.

## Step 6

- Remove the four screws that hold down the speaker and pry up the speaker from the frame.

## Step 7

- Once the voice coil is removed, solder it back onto the bracket or replace the voice coil entirely.

To reassemble your device, follow these instructions in reverse order.
