

# Escort Passport Max2 Lens Replacement

A how to guide for replacing the Passport Max2's Lens.

Written By: Kelsey Ferrenberg

## INTRODUCTION

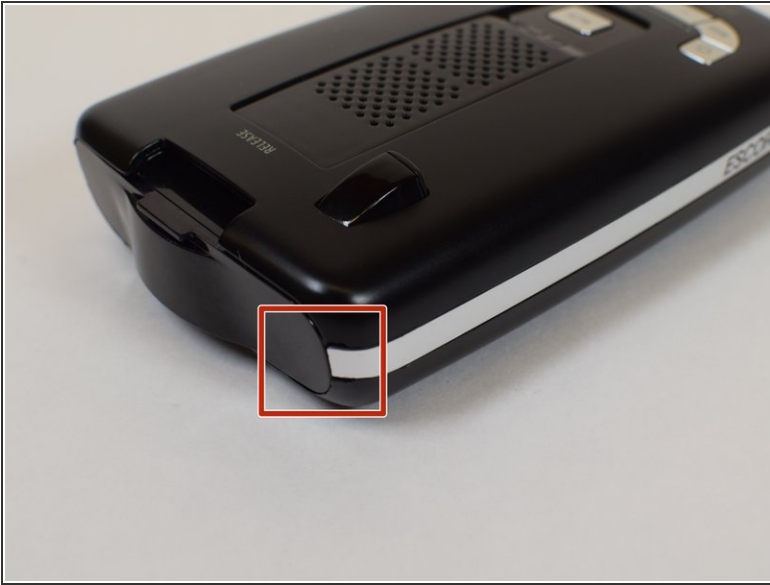

If the Passport Max2's lens gets cracked or damaged, this guide will communicate how to replace it.

### TOOLS:

- [Spudger](#) (1)
  - [Phillips #1 Screwdriver](#) (1)
-

## Step 1 — Exterior Case

- Insert the flat end of a spudger into one of the two notches and pry off the case.

## Step 2

- Slide the spudger around the perimeter of the radar housing until the case separates.

### Step 3

- Repeat these steps to remove the other side.

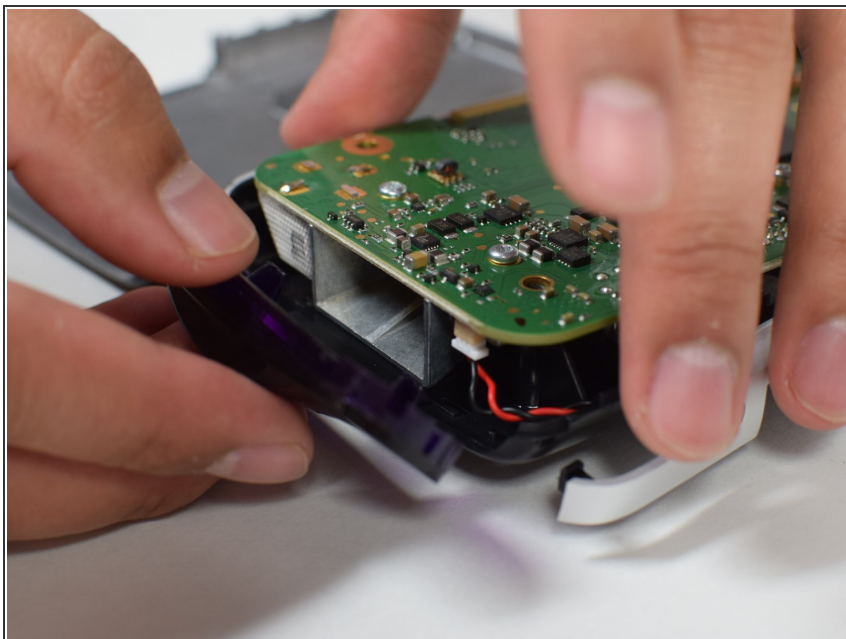

### Step 4 — Lens

- Remove the four 9mm Phillips #1 screws from the bottom of the radar.
- Remove the bottom case.

## Step 5

- Gently spread apart the thin silver frame that wraps around the device and remove the dark purple lens.
- ⓘ The silver frame can easily pop off of the device now that the bottom metal case has been removed. *Don't worry if it comes off all the way. It can easily be put back in it's place.*

To reassemble your device, follow these instructions in reverse order.
