

# FLIR FX Screen Replacement

This guide will help replace the FLIR FX camera screen if it cracks or just stopped working.

Written By: Emily Bell

---

## INTRODUCTION

This guide will help replace the FLIR FX camera screen if it cracks or just stopped working.

---

### TOOLS:

- [iFixit Opening Tools](#) (1)
-

## Step 1 — Screen

- Use blue plastic opening tools to get under the black covering around the lens

## Step 2

- Pop off the black covering so the square camera lens is completely exposed.

To reassemble your device, follow these instructions in reverse order.
