INTRODUCTION

Use this guide to repair the clear indicator light. This guide will help you through replacing the light bulb.

TOOLS:

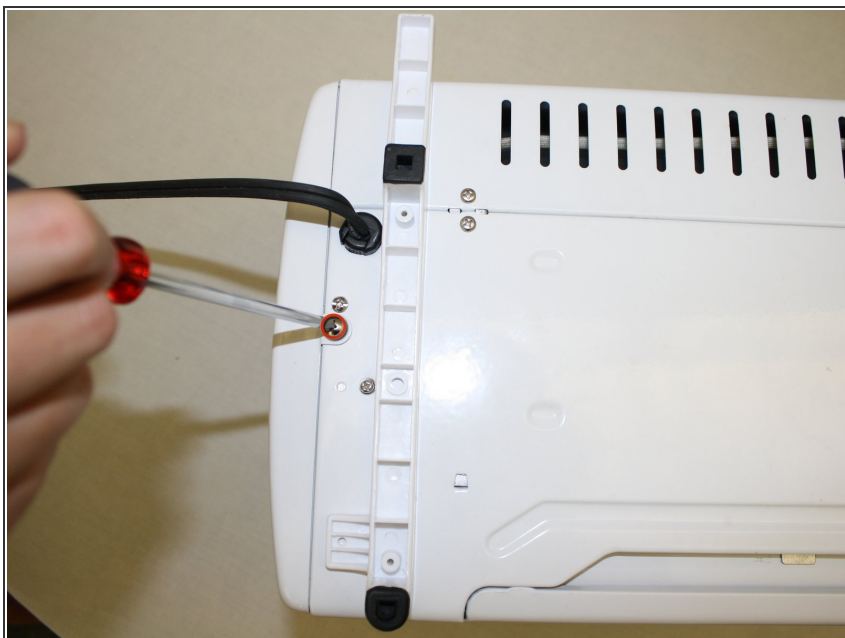

- [Electrical Tape in 6 Assorted Colors](#) (1)
 - [Large Needle Nose Pliers](#) (1)
 - [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Indicator Light

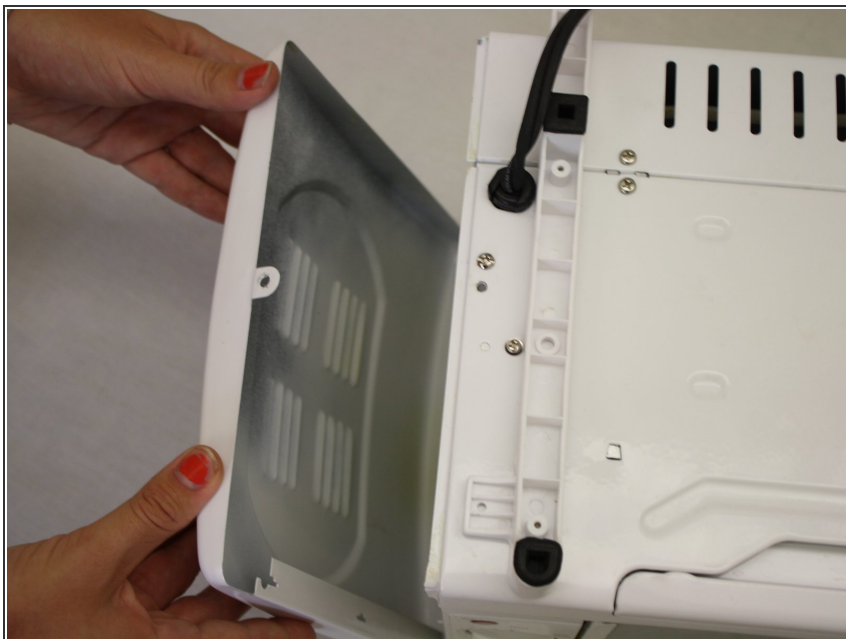

- ⚠ Make sure toaster is unplugged.
- Turn toaster upside down so screws on bottom side are facing toward the ceiling and the door is facing towards you.

Step 2

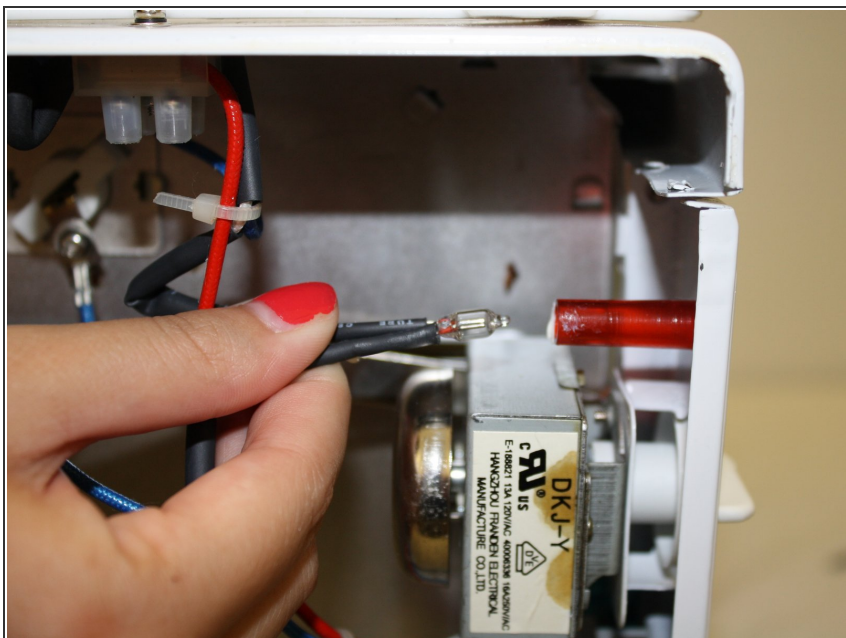

- On the left hand side, unscrew the middle screw.

Step 3

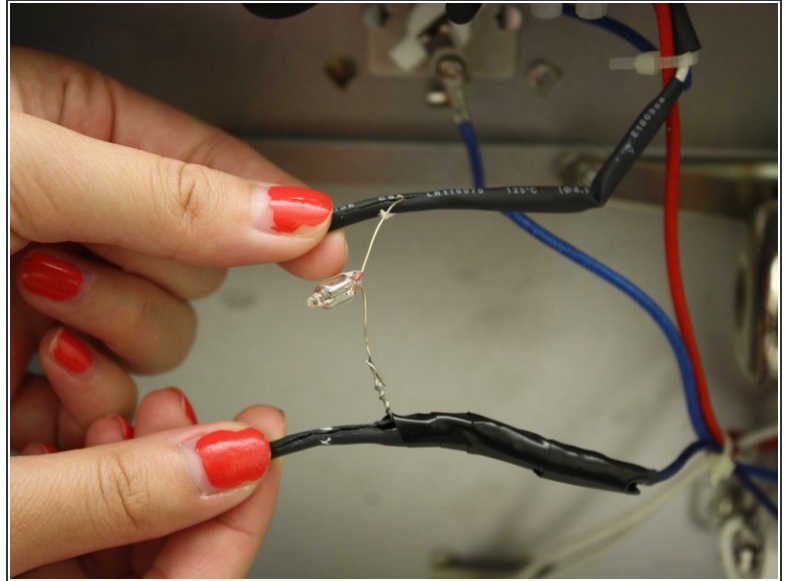

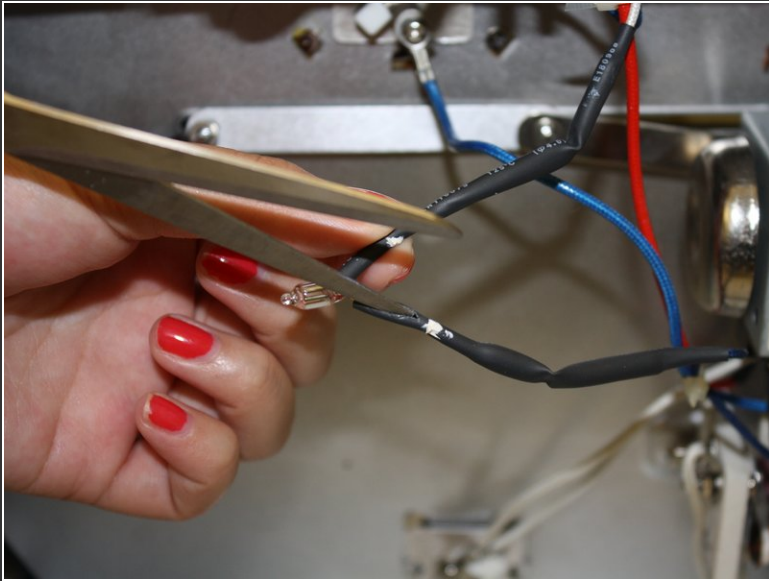

- Remove the panel on the left hand side. The indicator light is located in the red tube that has wires covered by black tubing coming out.

Step 4

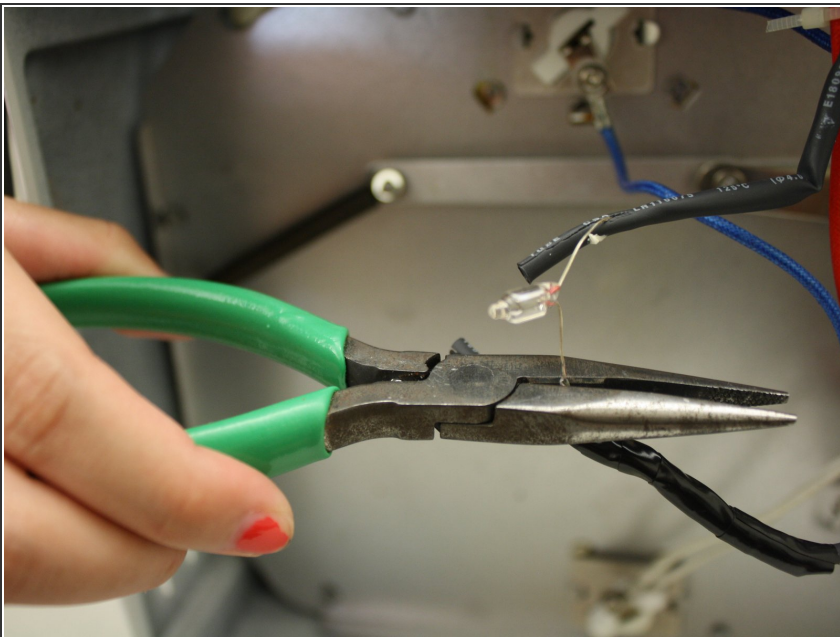

- Pull the black wires to remove the indicator light from the red tube.

Step 5

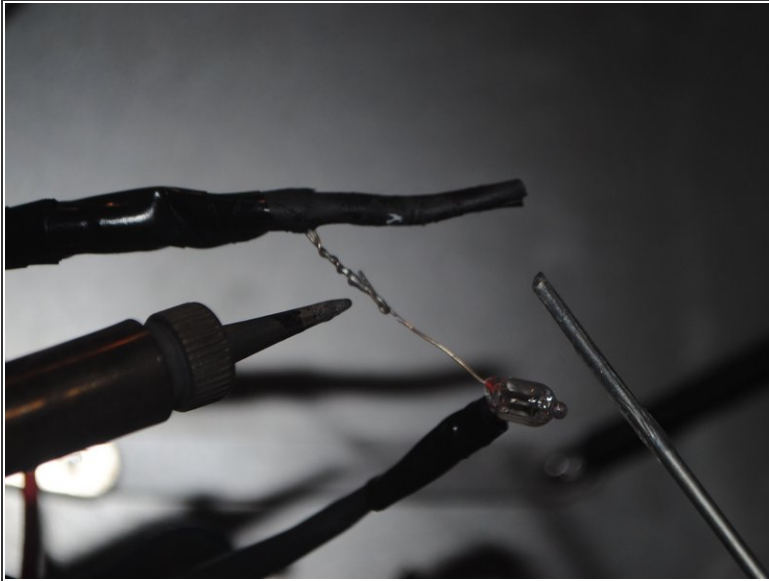

- Use scissors to cut open cord sheathing and peel back.

Step 6

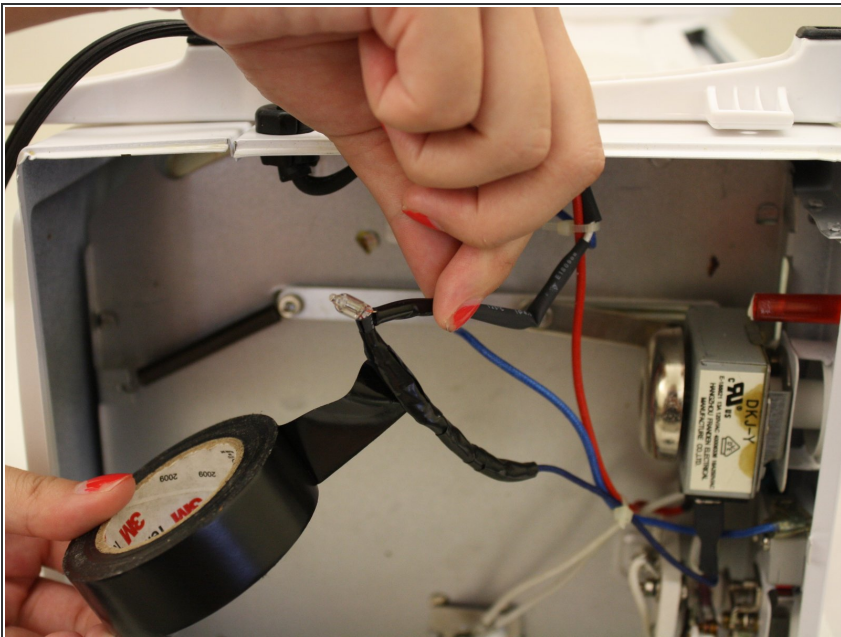

- Use the wire-cutters to remove the light bulb.

Step 7

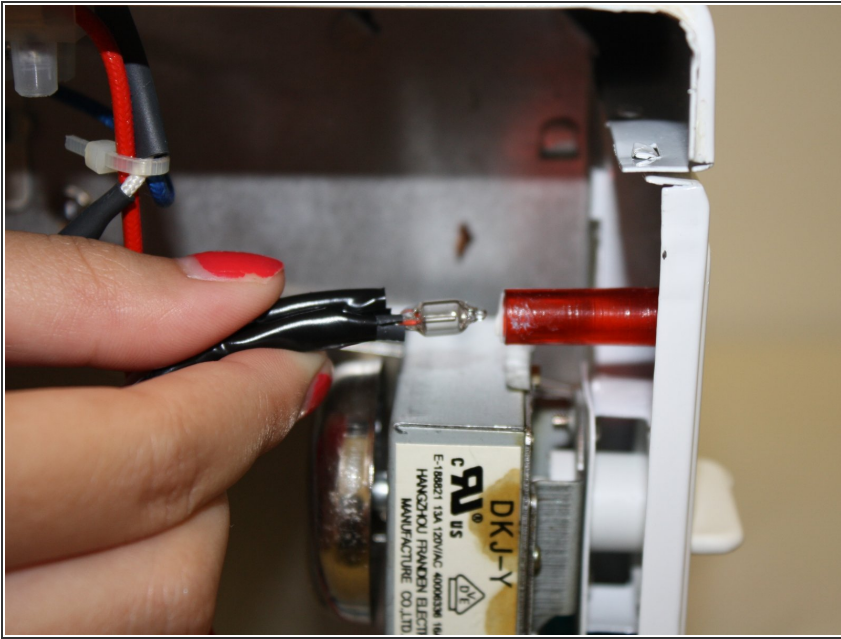

- Solder the replacement light bulb back onto its original position.

Step 8

- Use electrical tape to reseal the sheathing.

Step 9

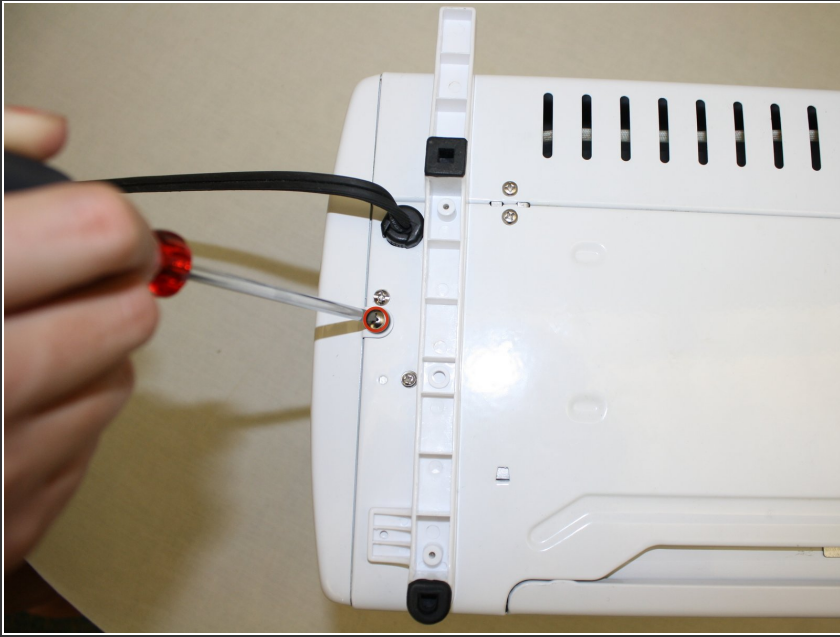

- Reinsert the indicator light back into the red tube.

Step 10

- Turn toaster upside down so screws on bottom side are facing toward the ceiling and the door is facing towards you.

Step 11

- On the left hand side, screw the middle screw back in.

To reassemble your device, follow these instructions in reverse order.
