

Fender Starcaster String Removal

How to remove the strings on a Starcaster by Fender electric guitar.

Written By: Christopher Hartigan

INTRODUCTION

There are many different styles of tuners and bridges, therefore, many different methods of removing the strings. This Starcaster has a string-through bridge and standard in-line tuners, so the string changing process is fairly simple.

TOOLS:

- [Small Needle Nose Pliers](#) (1)
- [Flush Cutter](#) (1)

PARTS:

- [New strings](#) (1)
String gauge is based upon personal preference.

Step 1 — Loosen the Strings

- Start by loosening the strings. This is done by turning the tuning knob until the string has lost tension.
- Repeat this for all six strings on the guitar.

Step 2 — Remove the Strings from the Tuning Pegs

 Be mindful of the string ends. They may be sharp and could puncture your skin.

- It may be necessary to use pliers to remove string ends from the tuning peg.

Step 3 — Remove the Strings from the Bridge

- After removing the strings from the tuning pegs, slide the strings through the bridge and out of the back of the guitar.
- If the twists in the string ends are in the way, use wire cutters to snip them off. This will allow the heavier strings to pass through the bridge easier.
