

# Fujifilm FinePix XP70 Back Panel Replacement

Prerequisite only

Written By: Olivia A

---

# INTRODUCTION

Prerequisite only

## TOOLS:

- [Phillips #0 Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
  - [Metal Spudger](#) (1)
  - [1.5mm Hex Screwdriver](#) (1)
-

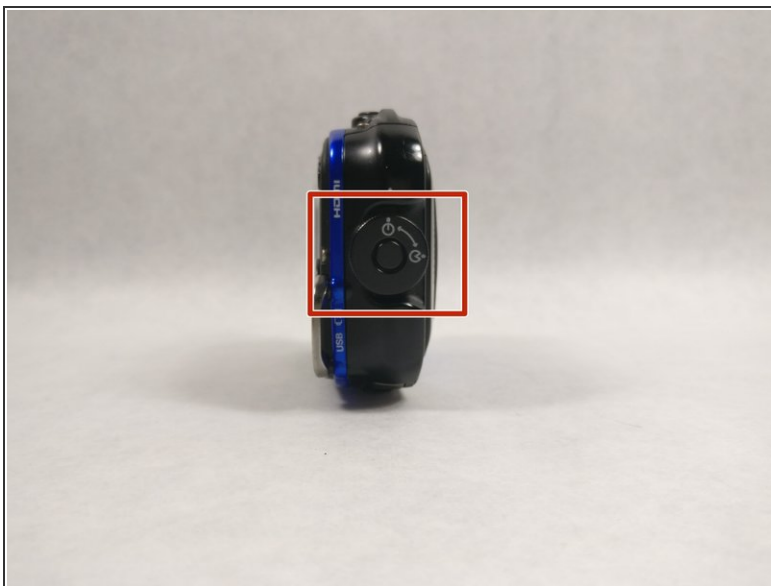

## Step 1 — Battery

- Power off the camera.

⚠ Leaving the camera on while removing presents the risk of electrical shock or permanent data loss.

## Step 2

- Push down on the center button and turn the dial on the side counterclockwise to open the battery compartment.

## Step 3

- Pull the orange tab towards the hinge to release the battery.

## Step 4 — Button

- Pry the black button plate off using a plastic opening tool.
- ⓘ Buttons can fall out easily.
- ⓘ It's easiest to start from the side exposed by an open battery compartment.
- ✦ When putting this plate back on, orientate the buttons as shown to properly fit back into the plate.

## Step 5

- Pull the three buttons out.

## Step 6 — Front and Back Panel

- Remove one Phillips screw with a Phillips head 0 screwdriver
- Remove one hex head screw with a hex 1.3 screwdriver bit.

## Step 7

- Unscrew two 4.0mm long hex head screws with a hex 1.3 screwdriver bit.

## Step 8

- Unscrew five 4.0mm screws with a Phillips head 0 screwdriver

## Step 9

- Pry the black bottom plate off using a plastic opening tool.
- ⓘ It is easier to start on the side of the open battery compartment.

## Step 10

- Pry the front plate off using a plastic opening tool.
- ⓘ It's recommended to start at the ridge on the top or bottom side.

## Step 11

- Lift off the front plate.

## Step 12

- Pry the back plate off with a plastic opening tool

## Step 13 — Back Panel

- Pry the two latches off using a spudger.

ⓘ It takes some force to pry the latches off, so be careful to not break them.

## Step 14

- Pry the remaining latches with a plastic opening tool.

ⓘ It's best to start on the opposite side. Then pry off the top and end at the bottom.

ⓘ It may take some force to remove this, but be careful to not break the latches off.

## Step 15

- Pull the two halves apart.
- ★ Reattach the LCD ribbon cable into the slot before closing the halves when reassembling.

## Step 16

- Unscrew seven 4.0 mm screws with a Phillips 00 screwdriver.
- Unscrew four 3.0 mm screws with a Phillips 00 screwdriver..

To reassemble your device, follow these instructions in reverse order.
