## INTRODUCTION

This guide shows how to remove the exterior case of the Fujifilm FinePix XP80 in order to access the interior and make other repairs or replacements.

### TOOLS:

- [iFixit Opening Tools](#) (1)
- [Phillips #000 Screwdriver](#) (1)

## Step 1 — Exterior Case

- Using a Phillips PH000 bit, remove the five 2mm screws on the bottom of the camera.

## Step 2

- Using a H1.3 hex head bit, remove the two 2mm screws from the top of the camera.

## Step 3

- Using a H1.3 hex head bit, remove the two 2mm screws on the side of the camera.

## Step 4

- Using a plastic opening tool, gently pry up the edge of the button case, located at the top of the camera, until it unclips.

## Step 5

- Gently pry the side area of the case apart.

## Step 6

- Continue using the opening tool on the bottom of the camera to gently pry the case apart.

## Step 7

- Use the plastic opening tool to carefully pry the yellow front panel completely away from the camera.
- Use your hands to take off the yellow back panel.

To reassemble your device, follow these instructions in reverse order.
