

# Fujitsu M2011 Keyboard Replacement

This guide will demonstrate how to remove the keyboard for the Fujitsu M2011 laptop.

Written By: Spencer Spaulding

## INTRODUCTION

In order to remove the keyboard, you will need a Phillips screwdriver. This repair may be required if your keyboard is damaged or unresponsive.

### TOOLS:

- [Phillips #0 Screwdriver \(1\)](#)

## Step 1 — Battery

- Slide switch #1 (shown) to the left.

## Step 2

- Slide switch #2 (shown) to the right and hold.

## Step 3

- Pull the battery straight back out.

## Step 4 — Keyboard

- Remove the three 4.6 mm PH0 screws in battery chamber.

## Step 5

- Lift the black plate with the power button gently.

## Step 6

- Remove the keyboard.

**i** There will be tape on the wired connection to the motherboard.

To reassemble your device, follow these instructions in reverse order.
