INTRODUCTION

The purpose of the memory cards are for quick memory slots, this model specifically has two memory cards that are blue in color. Before attempting to do a replacement, make sure your device is powered off and make sure to read through the guide first before jumping straight into a repair. Safety is always first!
⚒ TOOLS:
- Spudger (1)
- Phillips #1 Screwdriver (1)

This document was generated on 2020-01-21 03:44:19 PM (MST).

Step 1 — Faulty Battery

- Before doing anything, first make sure the laptop is turned off and flipped over. In this position your laptops bottom side should be facing up.
Step 2

- With a plastic spudger or your fingers, push down on the battery clip, while simultaneously moving the spudger to the right to release battery.

|

Step 3

- Remove the battery by detaching it from the laptop casing. Once removed, set the battery aside and insert the new battery.
Step 4 — Memory Cards

- Locate the casing that protects the memory cards, wireless card, and hard drive.

Step 5

- With the PH1 head from the tool kit and the adjustable screwdriver, remove the 2 M3x5.0mm screws on the casing to get to the memory cards.
Step 6

- On each memory card there are two silver latches holding them in place
- Release the latches to be able to remove the memory cards.
