- Click on the + step window

Step 3 — Add the info to your step

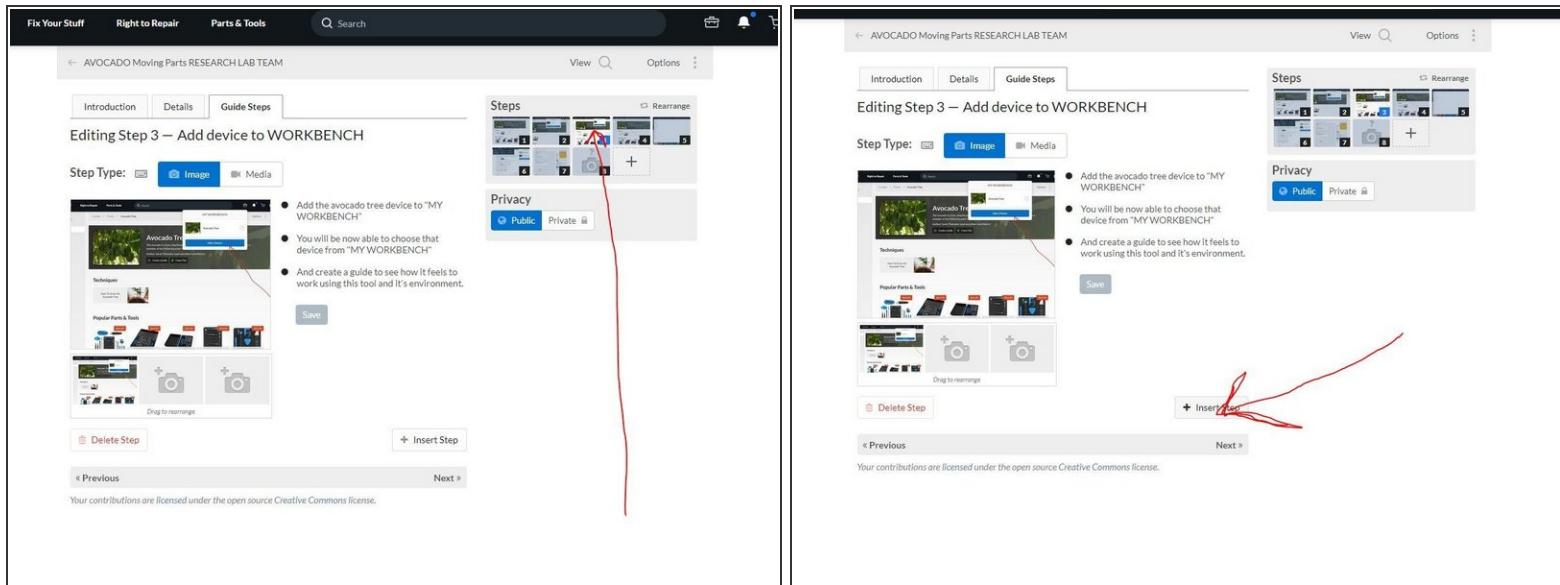

- Write the information and add the images are missing to follow this step.

Step 4 — Rearranging

- Once your step is finished
- Click on Save
- If you don't save you won't be able to rearrange
- Click on rearrange
- Click on the last step that should be the new, and drag and drop where you want it.

Step 5 — Add step without "Rearrange"

The image consists of two side-by-side screenshots of a digital guide editor. The left screenshot shows a 'Guide Steps' section with a list of steps. One step is highlighted and has a red arrow pointing to a 'Rearrange' button. The right screenshot shows a similar section with a step being moved between other steps, indicated by a red arrow and a red line. Both screenshots include a 'Privacy' section with 'Public' and 'Private' buttons.

- Don't worry where has been created the step. You will be able to drag the step to where you need it.
- If you want exactly after the step you want and you want to save the step of rearrange. Follow the steps of the images of this step.

To reassemble your device, follow these instructions in reverse order.
