

# Garmin Dezl 760LMT Screen Replacement

Replace your Garmin's broken, malfunctioning, blurry, or cracked screen to restore proper functioning to the GPS.

Written By: Ryan Williams

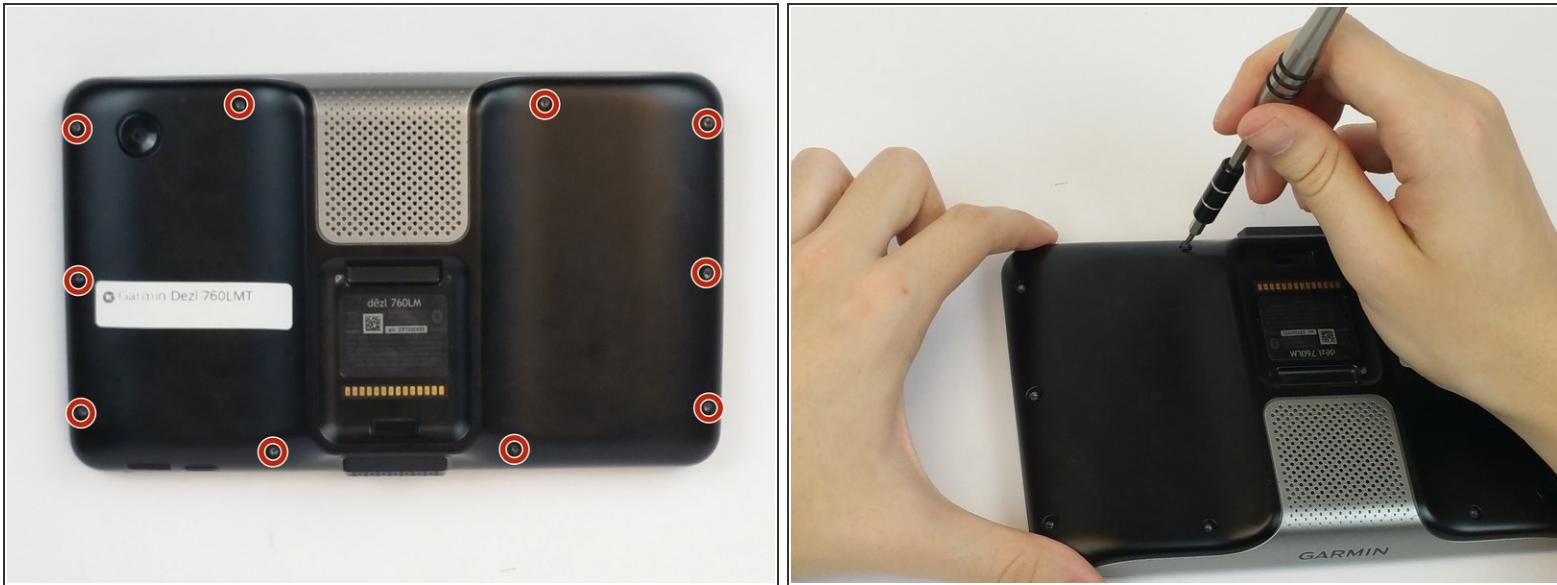

## INTRODUCTION

This guide will show you how to properly and safely remove the Garmin Dezl 760LMT's screen from the motherboard and its casing.

### TOOLS:

- [Anti-Static Wrist Strap \(1\)](#)
- [T6 Torx Screwdriver \(1\)](#)
- [Metal Spudger \(1\)](#)
- [T5 Torx Screwdriver \(1\)](#)

## Step 1 — Back Panel

- Using a Torx T6 Screwdriver, remove the ten 7mm screws from the back panel.

## Step 2

- Using a metal spudger, pry the device apart.

 To recombine them, line up the two halves of the device and press them together.

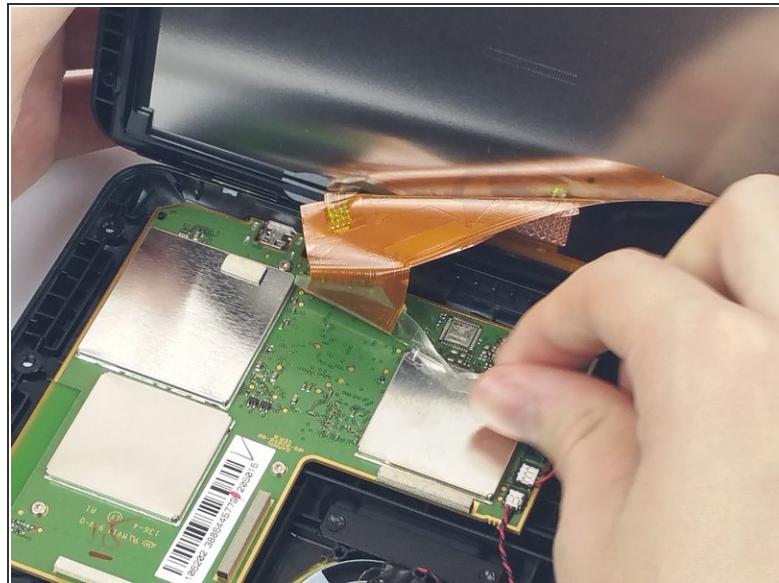

## Step 3

- Turn the device over, laying it on its back with the screen facing upwards.
- Lift the front panel away from the silver part of the back panel.

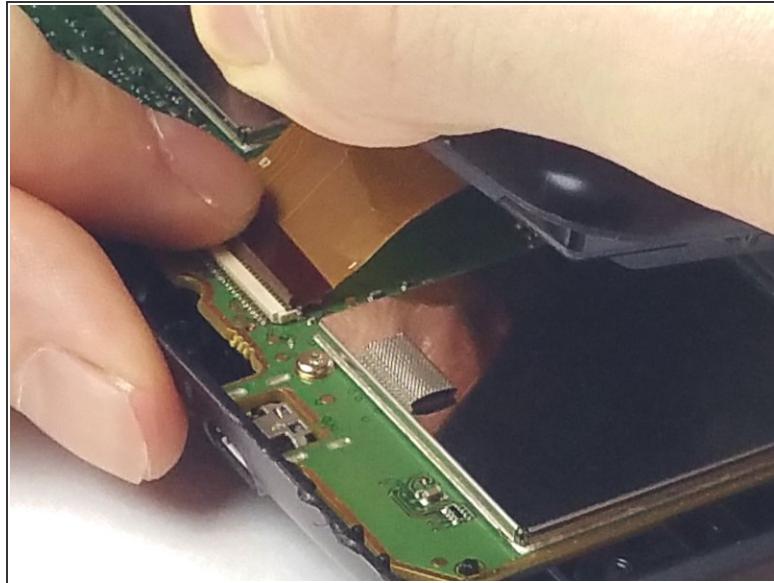

**⚠** Make sure not to rip the ribbon cable that is connected to the screen and the motherboard.

## Step 4 — Screen Ribbon Cable

- Lift the screen opposite where the "GARMIN" logo is located. Remove the clear tape holding the ribbon cable to the motherboard.

## Step 5

- Find and lift the small grey hinge at the end of the ribbon cable.

 When handling the motherboard, make sure to wear an anti-static wrist strap.

## Step 6 — Screen

- Using a Torx T5 screwdriver, unscrew the four 7mm screws from the back plate of the screen.

## Step 7

- Turn the screen over so that it is facing upwards.
- Remove the front plate of the screen.
- Lift the screen from its back casing.

To reassemble your device, follow these instructions in reverse order.
