

# Gateway ID49C07U Screen Replacement

Written By: Ryan Howlett

 **TOOLS:**

- **Phillips Head Screwdriver: Size PH1 (1)**
- **Tweezers (1)**

## Step 1 — Battery

- Turn the laptop over so the bottom of the device is facing upwards with the hinge facing away from you.

## Step 2

- Locate the switch on the top left of the laptop labeled with a padlock symbol.
- Flip the switch in the direction of the unlocked padlock symbol.

## Step 3

- Locate the switch that releases the battery and slide it to the right.

## Step 4

- While holding the release switch to the right, pull the battery away from you.

## Step 5 — Screen

- Turn the laptop over and open.

## Step 6

- Use the Small metal spudger to remove the small black screw covers in the bottom corners of the screen

## Step 7

- Use the PH1 Screwdriver to remove the screws

## Step 8

- Use the small metal spudger to start separating the front plastic cover from the back plastic cover

## Step 9

- Once there is enough room for you to fit your hand underneath the top plastic cover you can start peeling it back. It will make a lot of popping noises as it unclips when you separate it.

## Step 10

- Once the plastic cover is off locate the 4 screws in the corners of the screen and unscrew them

## Step 11

- After the screws are out gently flip the screen over onto the keyboard

## Step 12

- Use the tweezers to peel back the tape over the wire connector on the bottom of the screen

## Step 13

- Hold the tape back with one hand and pull the connector out

To reassemble your device, follow these instructions in reverse order.
