Gateway MA6 Laptop Hard Drive Replacement

This guide will outline the steps necessary to upgrade or replace your laptop hard drive.
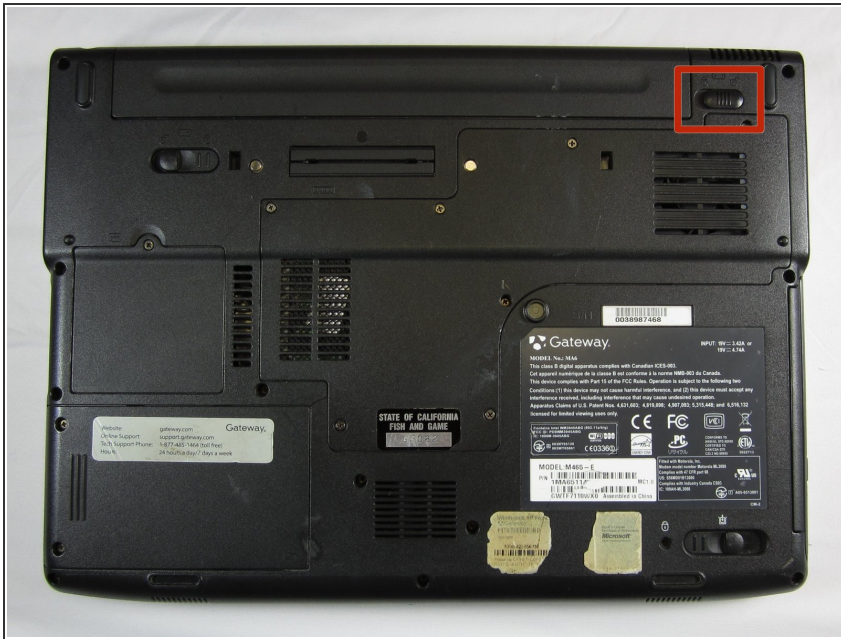

Written By: Chris Naughton

INTRODUCTION

Your laptop hard drive stores all of your files, as well as your computer's operating system. A corrupt hard drive will need to be replaced for your computer to power on and run. It is common to upgrade to a larger hard drive with more storage space.

⚙ TOOLS:

- Phillips #0 Screwdriver (1)

Step 1 — Battery

⚠️ To prevent injury, make sure the laptop is unplugged before removing the battery.

● Make sure the switch in the upper right corner of the laptop is switched to the "unlock" position (toward the unlocked padlock icon).
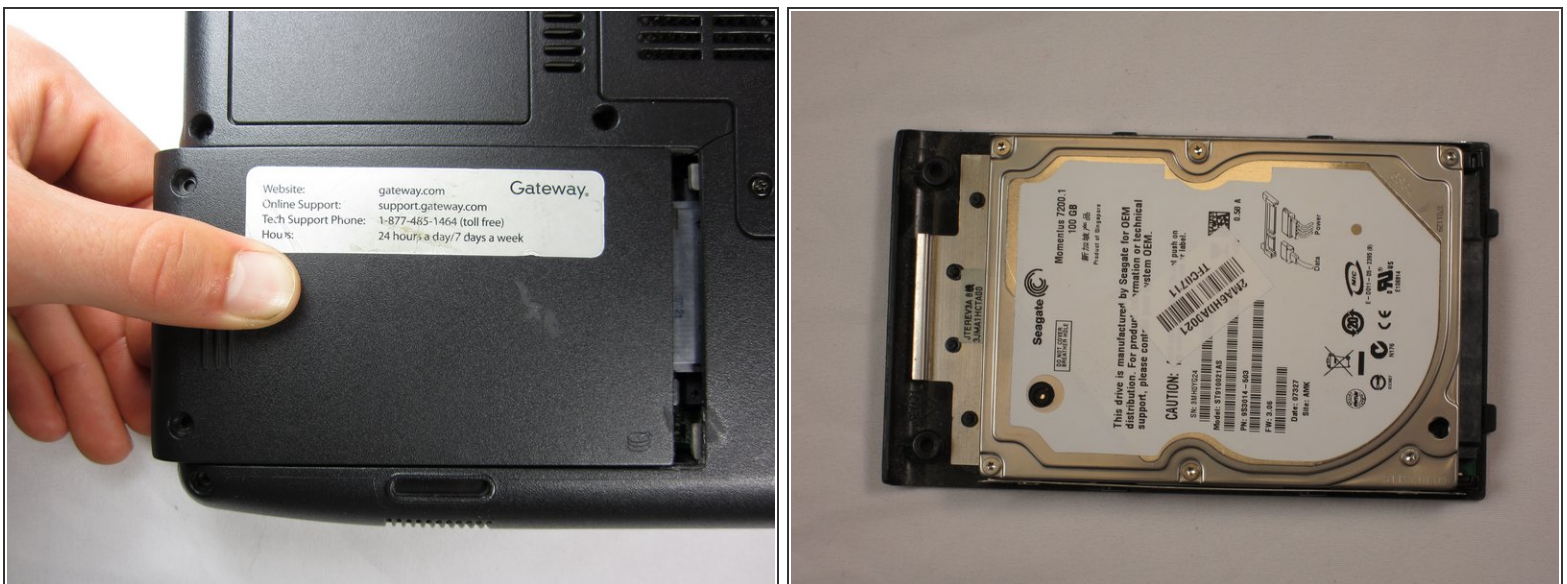

Step 2

● Pull the switch on the upper lefthand corner of the laptop towards the unlocked padlock icon.

● Firmly pull the battery outwards and away from the laptop.

Step 3 — Hard Drive

- Remove the two 9 mm Phillips #0 screws from the back of the hard drive cover.

Step 4

- Press thumb down firmly on the hard drive and pull outwards to the side.

To reassemble your device, follow these instructions in reverse order.
