

# Gateway MD2614u Key Replacement

This guide shows you how to replace a damaged key.

Written By: Toni Pipes

## INTRODUCTION

If a key on your laptop is damaged, replacing it is a short and simple process. All you need to do is open your laptop and use your finger to pop off the key.

## Step 1 — Key

- Place the laptop so the top cover is facing up.

## Step 2

- Open the laptop with the display facing you.

## Step 3

- Using your fingernail, apply pressure upward from underneath the key to pry it loose from its bearings.

To reassemble your device, follow these instructions in reverse order.
