INTRODUCTION

You are going to remove the back cover, locate the RAM, take out the RAM, and either replace it or reinstall it.

🔧 TOOLS:

- Phillips #00 Screwdriver (1)

⚙ PARTS:

- PC2-5300 1 GB RAM Chip (1)
- PC2-5300 2 GB RAM Chip (1)

Step 1 — Back Cover

- Place the laptop so the back cover is facing up.

Step 2

- Remove the 8 screws from the back cover using the Phillips #00 screwdriver.

Step 3

● Lift off the cover.

Step 4 — RAM

● Identify the RAM, which is a stack of two green cards in the upper left-hand corner.

This document was generated on 2020-02-28 12:43:40 PM (MST).

Step 5

- There are silver tabs on both sides of the ram. Simultaneously push the silver tabs outward.
Step 6

- The card pops up 20 degrees and is loose enough to remove with your hand.

- Carefully pull the card to the right horizontally.

Step 7

- Follow the same steps for the second RAM card, which is under the one you just removed.

To reassemble your device, follow these instructions in reverse order.
