Step 3 — Rear Housing

- Use the plastic opening tool to remove the faceplate.

- There is some adhesive and clips so be careful and the faceplate should pop right off.
Step 4

- Now that the faceplate is off, it is time to remove the 4 screws on each corner.

- Use the T4 tool bit from the iFixit toolkit in order to remove the 4 screws on each corner.

Step 5

- Note: Make sure you remove the door cover of the USB, mini HDMI, and SD port before. Separating the motherboard will be easier.

- Using the plastic opening tool, slowly pry open the motherboard assembly.

Step 6

- Use the spudger to gently pry off the connector of the housing to the motherboard.

- You should now have the motherboard assembly and the housing separated.

Step 7

- In order to replace the buttons. The entire housing has to be replaced.

To reassemble your device, follow these instructions in reverse order.
