

# Google Pixel Slate Motherboard Replacement

Use this guide to replace the motherboard in your Google Pixel Slate.

Written By: Spencer Alonge

 **TOOLS:**

- [Suction Handle \(1\)](#)
- [T3 Torx Screwdriver \(1\)](#)
- [T2 Torx Screwdriver \(1\)](#)
- [iFixit Opening Tool \(1\)](#)

## Step 1 — Screen

- Orient the Google Pixel Slate so that the screen is facing upwards.
- Use the iFixit opening tool to separate screen from main body.
- Use the suction cup to remove the screen from the body of the device.

## Step 2

- Gently disconnect the three flat-wires from the screen.
- Carefully separate and remove the screen from the body of the device.

## Step 3 — Motherboard

- Once the screen is removed, remove the two black, adhesive strips.

## Step 4

- Use a T3 Torx screwdriver to remove the two black screws that are holding down the copper strip.

## Step 5

- Use the T3 Torx screwdriver to remove the seven 3mm screws.
- Use a T2 Torx screwdriver to remove the pink 2mm screw closest to the edge.
- *(i)* There is a total of four blue 3mm screws, two black 3mm screws, one pink 3mm screw, and one pink 2mm screw holding down the plate.

## Step 6

- Lift and remove the metal plate.

## Step 7

- Remove the two speaker plugs, one battery plug, and disconnect the four flat wires from the motherboard.

*(i)* Nylon Tipped Tweezers may be necessary to remove the wires effectively.

## Step 8

- Use a T3 Torx screwdriver to remove the two silver screws.

**⚠** Remove the 4 exposed washers from the motherboard and put aside.

## Step 9

- Use the iFixit opening tool to remove the motherboard from the device.

To reassemble your device, follow these instructions in reverse order.
