Step 1 — Charging Assembly

- Using a T5 Torx screwdriver, unscrew the two 3 mm screws from the daughterboard.

Step 2

- Using a pair of precision tweezers, carefully peel the orange tape from the frame.

Step 3

- Using a blue plastic opening tool, detach the connector by gently pulling to the right.
- *(i)* Applying too much force may result in damaging the black connector and/or the cable.

Step 4

- Gently lift the daughterboard out of the device.
- *(i)* To replace the charging assembly, you will need to replace the entire daughterboard.

To reassemble your device, follow these instructions in reverse order.
