Step 1 — HDD
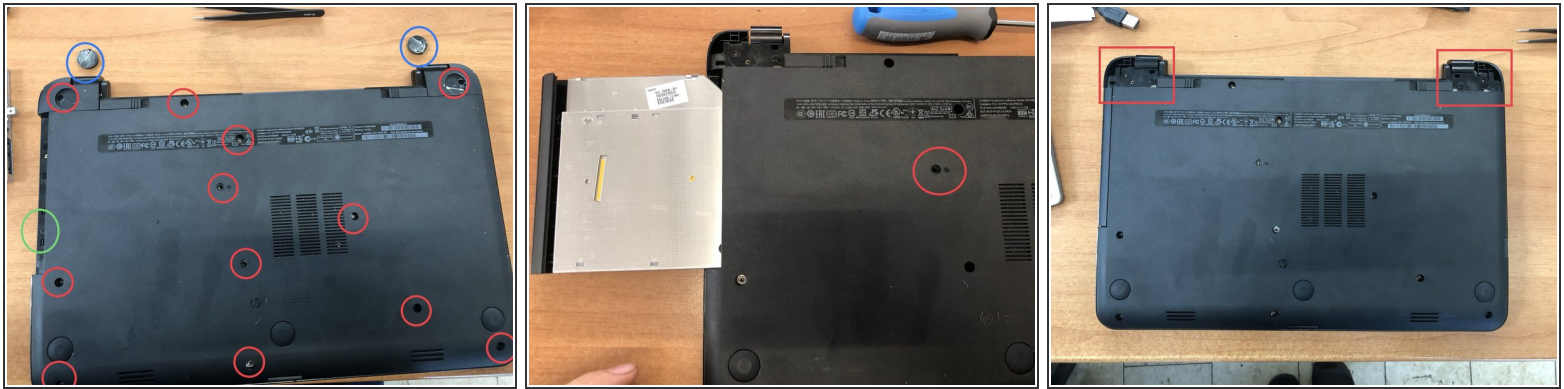

- Remove the battery pack

- Remove the two rubber pads on the display side

- Remove 11 Philips screws framed in red

- Remove DVD Drive

- Remove the screw (maybe 2 screws) framed in green

Step 2

- Insert a thin tool or a flat screwdriver in the little slits on the upper side of the keyboard lift up, to unhook the locking clips.

- Lift up the keyboard, being careful about the flat cable.

- Lift up the connector and disconnect the flat removing the battery.

Step 3
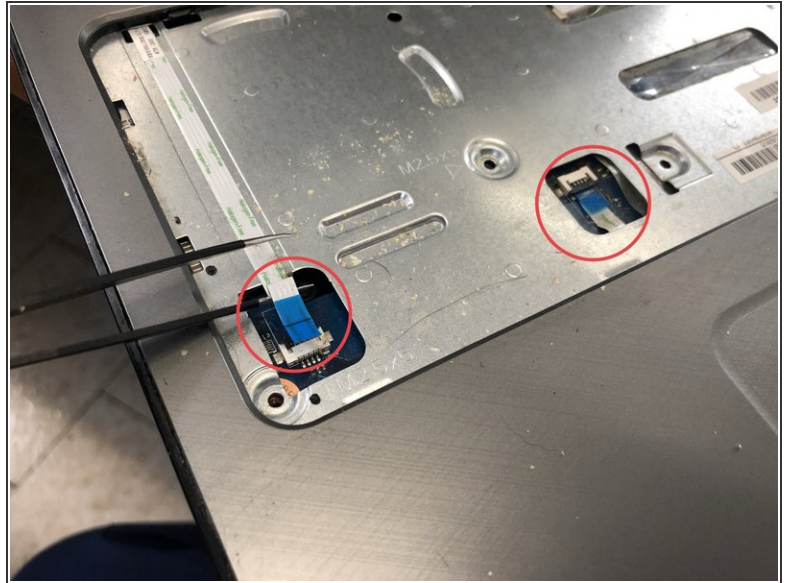

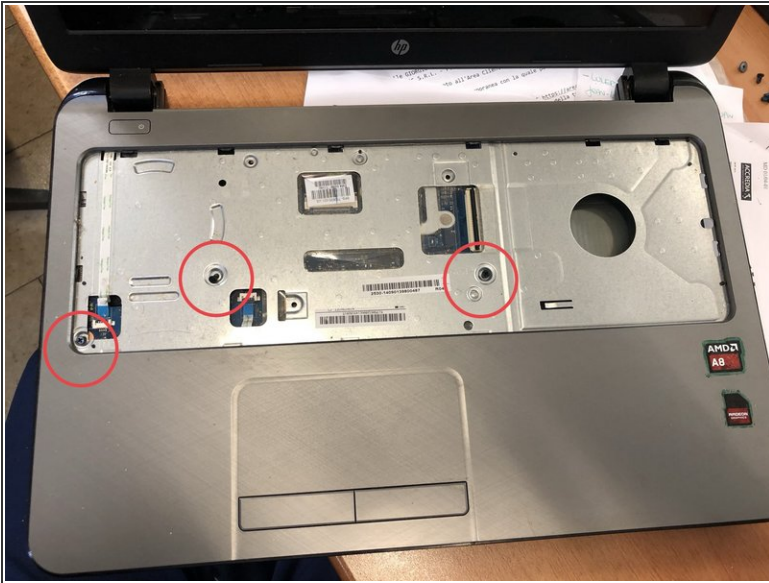

- Remove the 3 screws marked in red

- Unhook the 2 connector and unplug the flat cables

Step 4
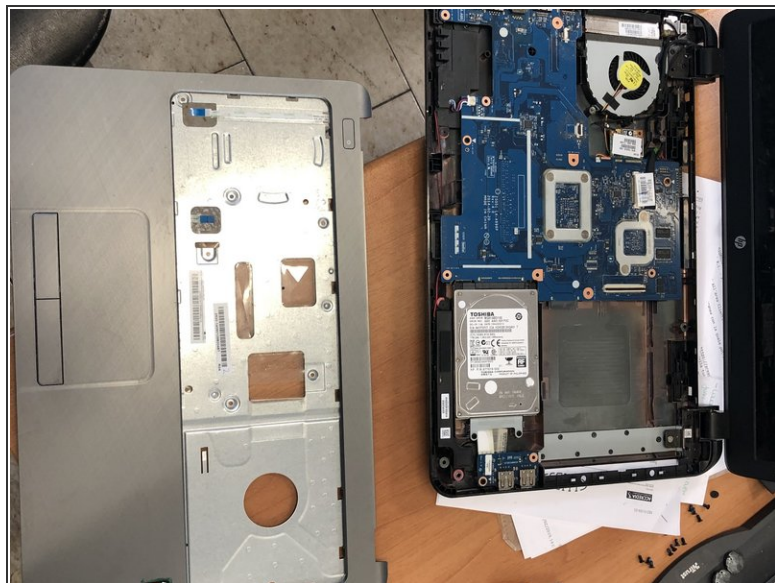

- With a thin instrument, release the clips around the perimeter retaining the top cover, leaving the rear shell containing the motherboard etc. (The iFixit [Jimmy](#) is ideal for this.)

- Remove the top cover, giving access to the hard disk.

To reassemble your device, follow these instructions in reverse order.
