Step 1 — Separating Digitizer and Case

- Insert the plastic opening tool between the digitizer and the case.

- Place the spudger in the gap created by the plastic opening tool to assist in separation.

Step 2
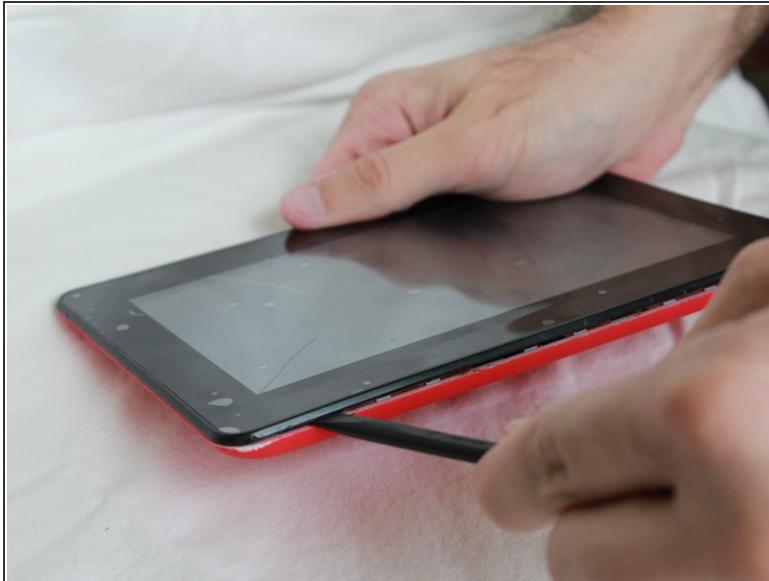

- Slide the spudger along the perimeter of the device to fully separate the two pieces.

Step 3 — Separating the Screen and the Digitizer
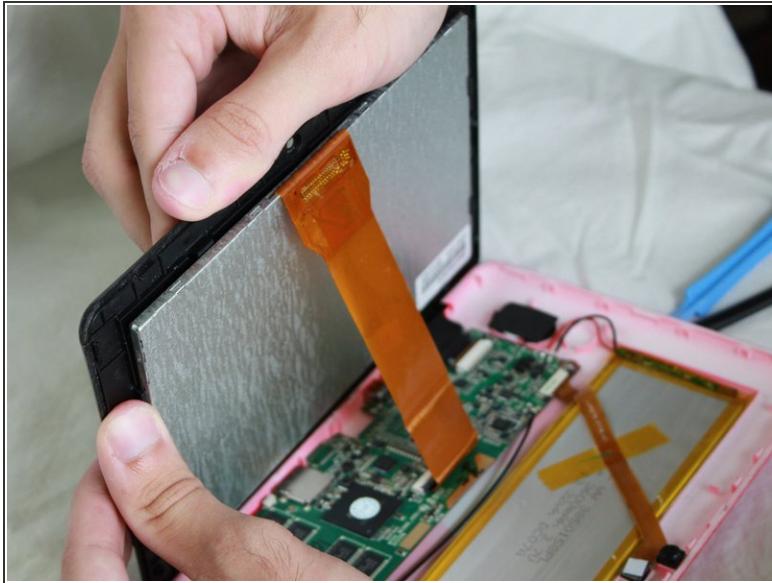

- Use your fingers to pop the screen out from the digitizer.

Step 4 — Removing the Cable from the Motherboard
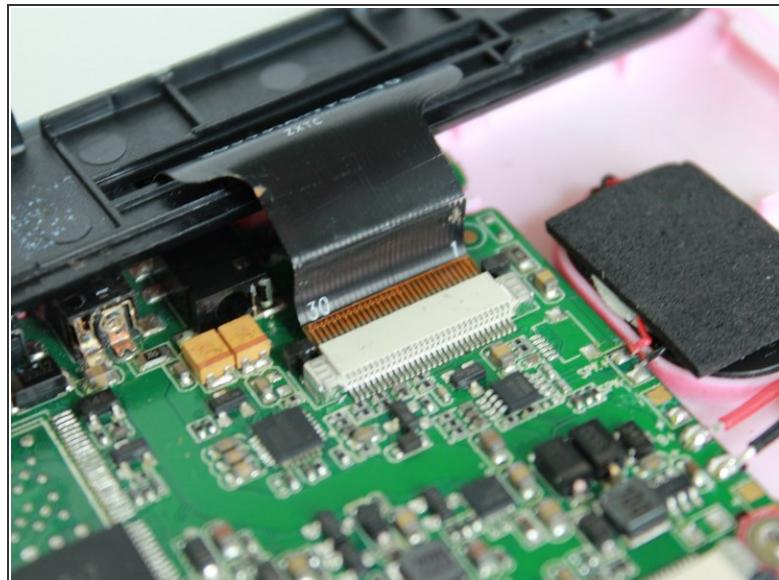

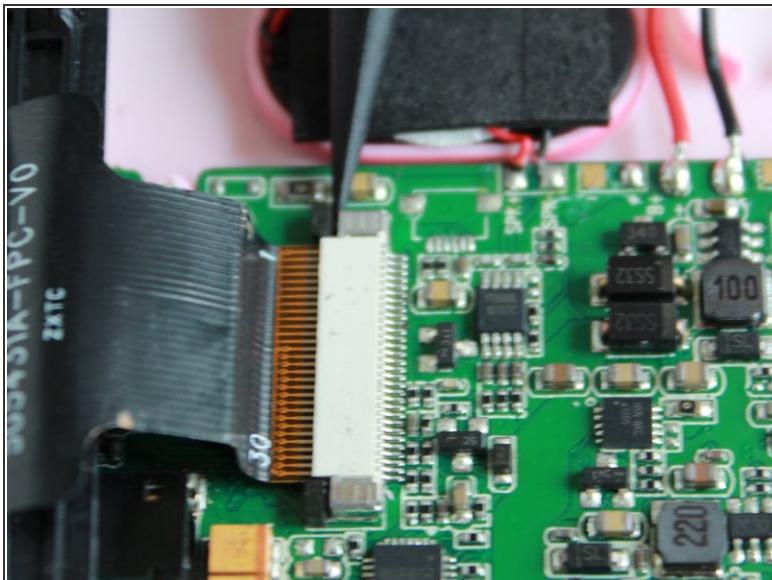

- Use the tip of the spudger to release the latches on the motherboard.
