HMDX Jam Battery Replacement

Show you step by step how to replace the jambox battery that is past its charge cycle.

Written By: Prince Tendai Dzonga

INTRODUCTION

Outline what you are going to teach someone how to do.

�* TOOLS:

- Soldering Iron (1)
- iFixit Opening Tools (1)
- Phillips #1 Screwdriver (1)

Step 1 — Opening speaker

● Use the plastic opening tool to pry off the rubber cover at the bottom of the speaker.
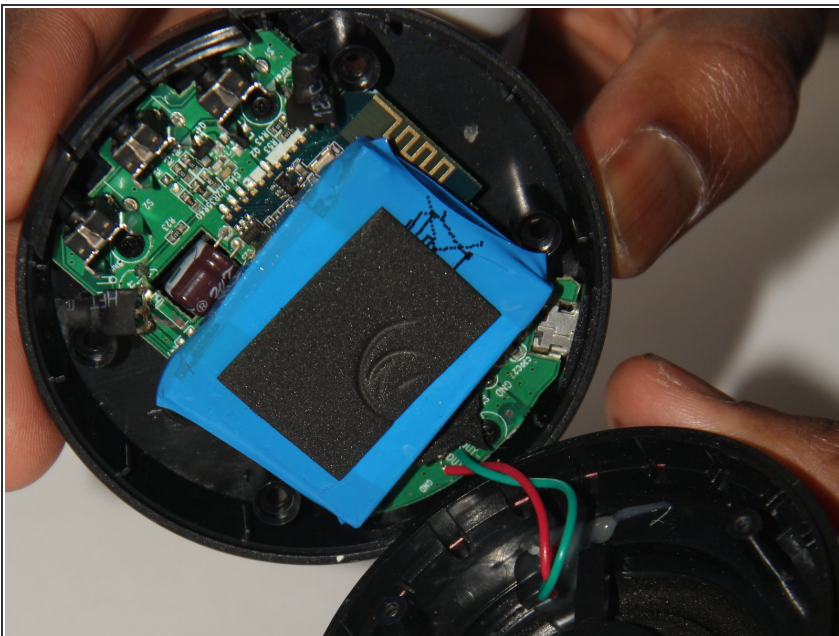

Step 2 — remove rubber cover

● Gently remove the rubber cover to expose the screws. If necessary, poke holes through the glue residue to expose the screw heads.
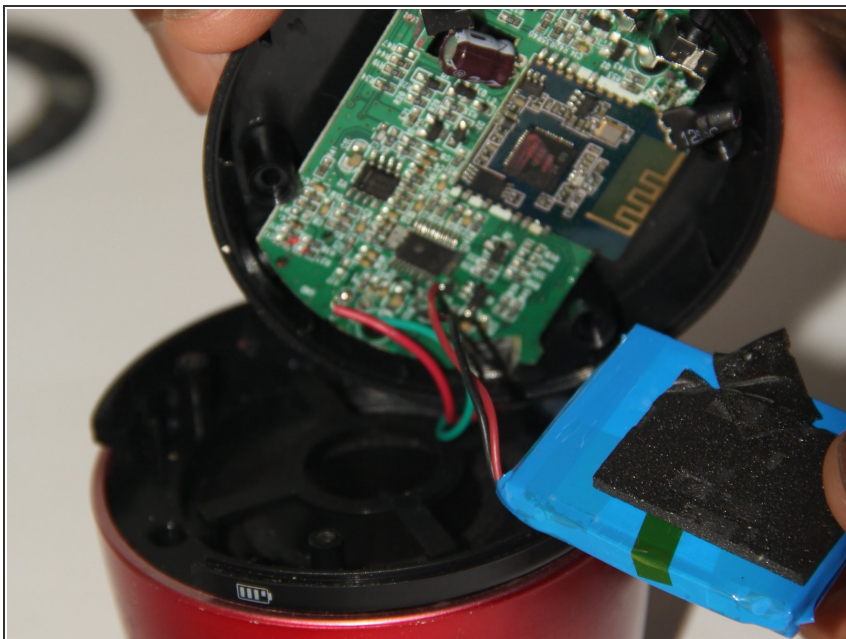

Step 3 — Remove screws

- Once you have exposed the screws, use a #1 Phillips screwdriver to remove the four 9 mm screws.

- ⓘ It would be wise to use a magnetic mat for the screws for safekeeping.
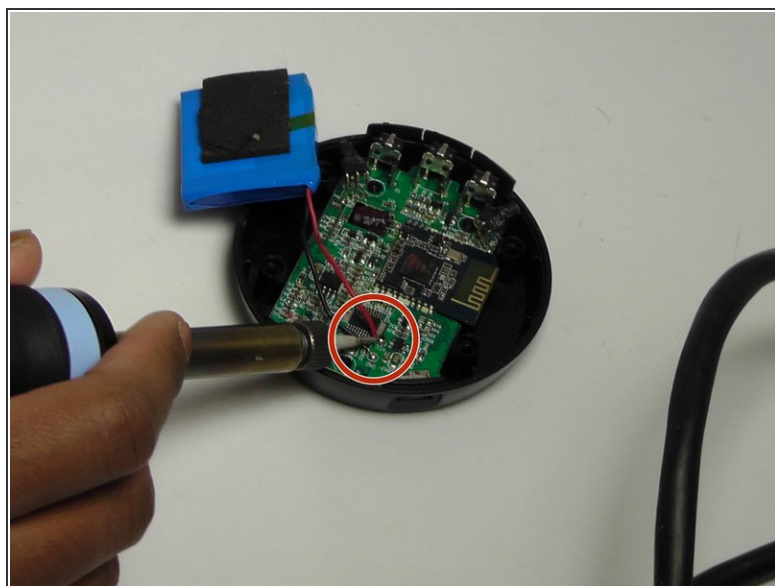

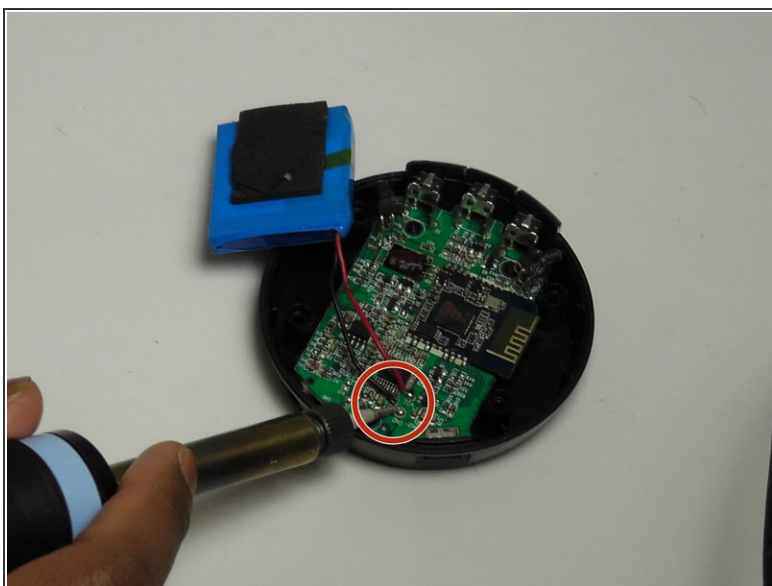

Step 4 — Exposing Battery

- Once you've removed the screws, open the case slowly. The battery is covered in blue packaging.

Step 5 — Removing Battery

- Very gently remove the battery from the motherboard.

Step 6 — Remove battery attachments

- Use a solder gun to remove the battery attachments from the motherboard.

To reassemble your device, follow these instructions in reverse order.
