INTRODUCTION

If you're looking to upgrade or replace the RAM in your laptop, consider using this guide to do so.
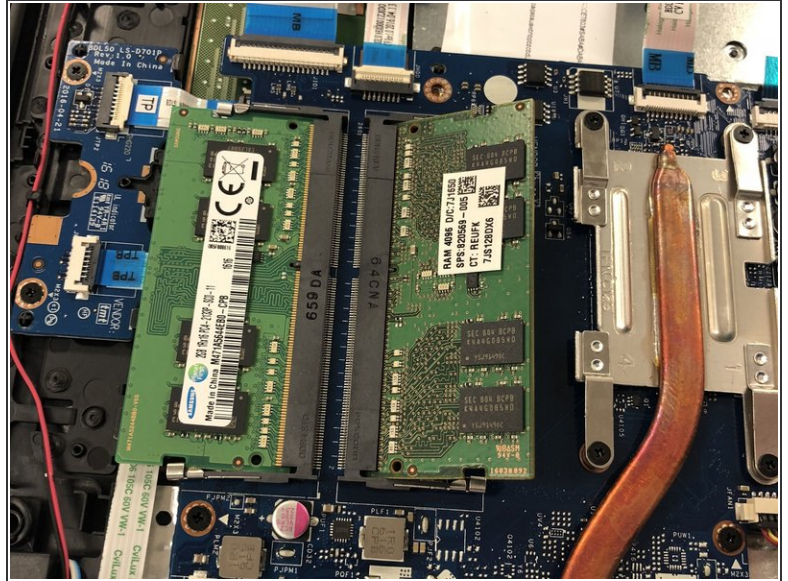

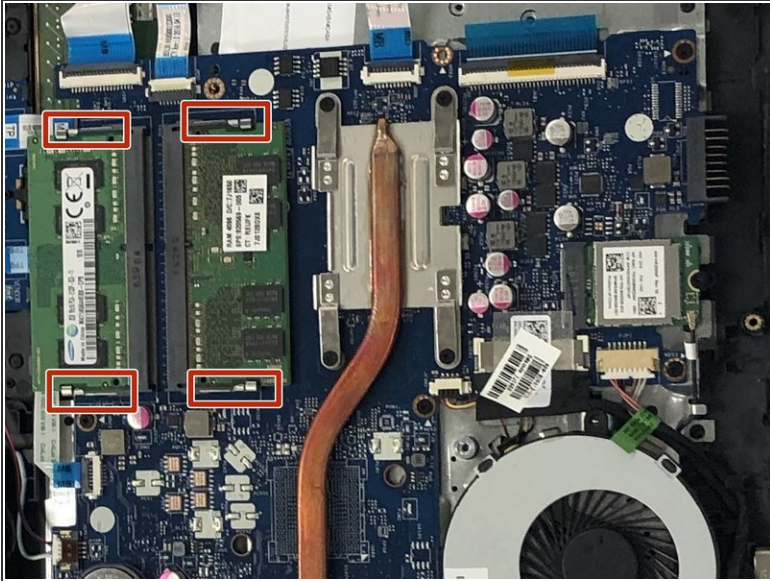

🔧 TOOLS:

- Phillips #1 Screwdriver (1)

Step 1 — RAM

- Remove the battery

- Remove the 12 screws from the back plate including 4 screws that are under rubber feet

- Remove CD drive

- Remove back plate

Step 2

- Pull the silver latches away from the RAM

- Once RAM is free it will spring up at an angle

- Grab the RAM stick by the side and pull out of the socket

Step 3

- When inserting the RAM make sure to line up the notch on the RAM card with the pin on the port

- Insert RAM until the gold contacts are no longer visible

- Press down ram stick till it clicks in
