

HP 17-bs049dx Hard Drive Replacement

Replacement of hard drive in your HP 17-bs049dx.

Written By: Logan McCarty

INTRODUCTION

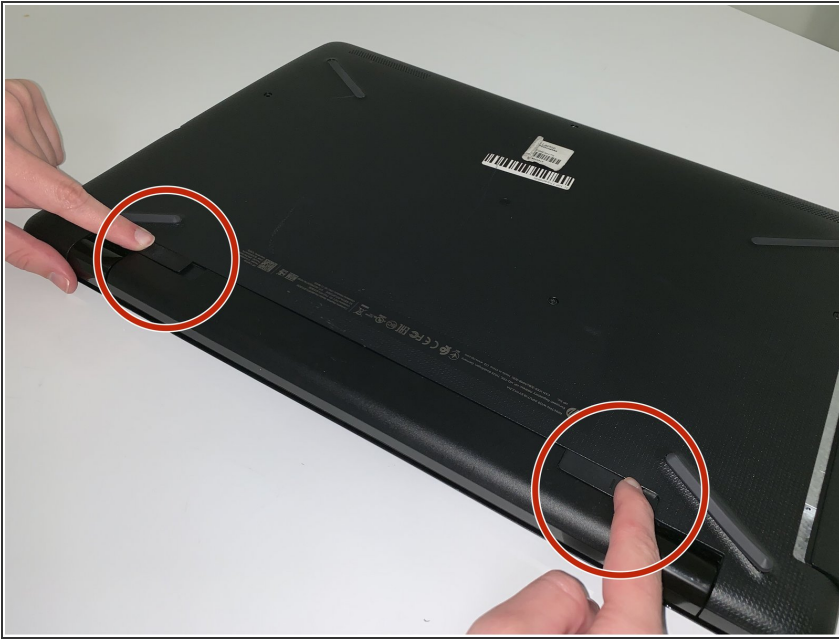

Use this guide to replace the hard drive in your HP 17-bs049dx.

TOOLS:

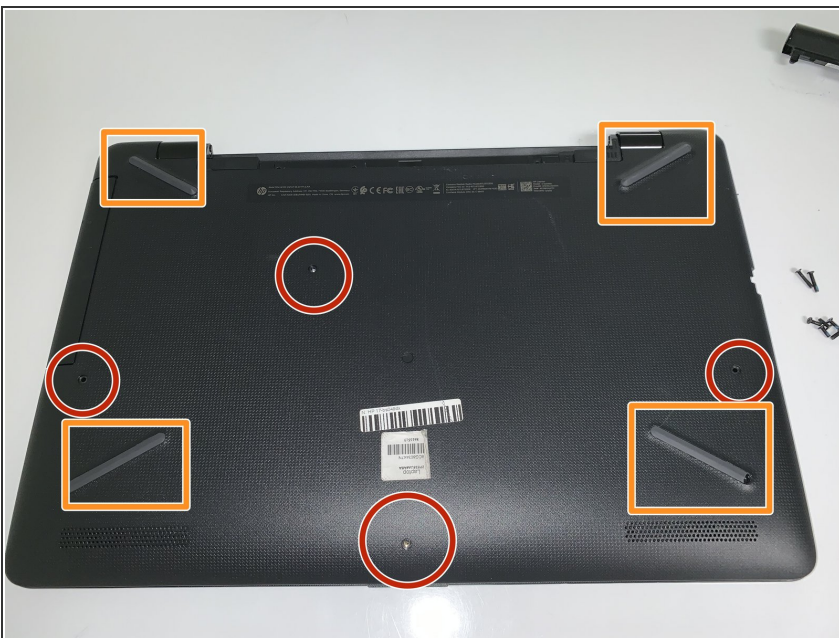

- [Metal Spudger](#) (1)
 - [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Battery

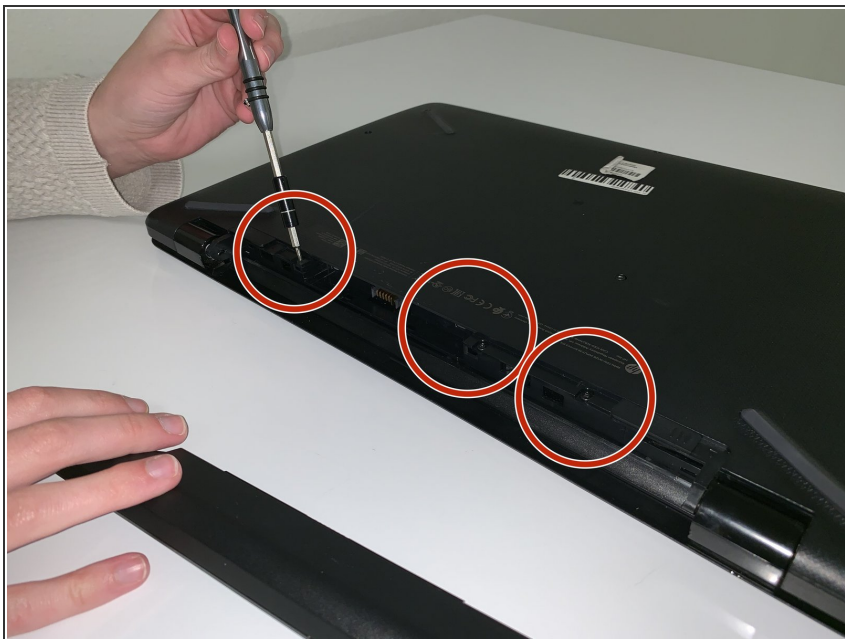

- To remove the battery, simply push the tabs towards each other.
- ⚠ The battery will come out with force, be sure to keep anything fragile away from the laptop during this process.

Step 2 — Back Panel

- Remove the four screws (13.7mm) with a Phillips #0 screwdriver.
- Be sure to lift all four rubber tabs to access screws (7.51mm) underneath.
- ⚠ Rubber tabs will require force to access screws.

Step 3

- Use the Philips 0 screwdriver to unscrew the screws (7.51mm) that were underneath the battery.

Step 4

- Pull outwards on the disk reader to remove from main frame.

⚠ This removal will require force.

⚠ All screws must be removed before removing disk reader.

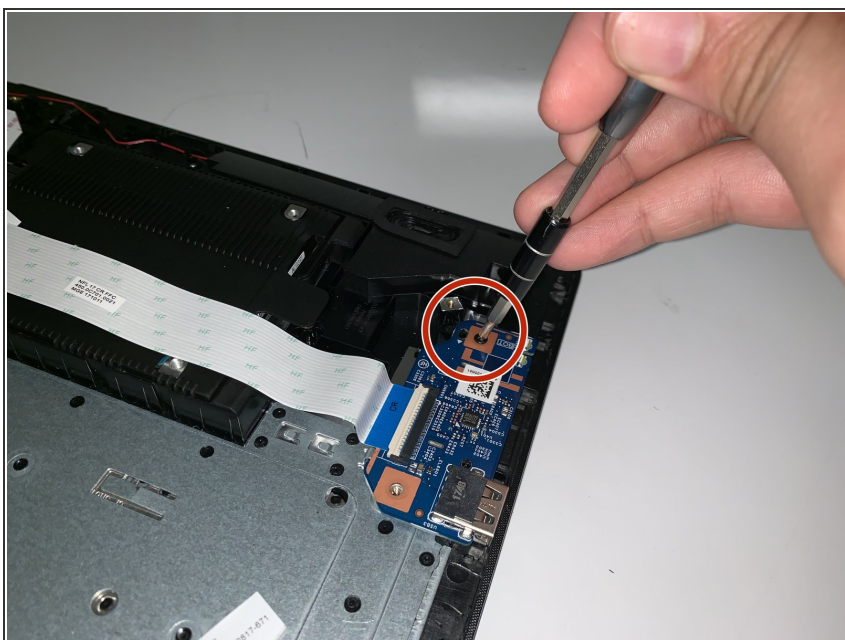

Step 5

- Lift back panel to access internal components.

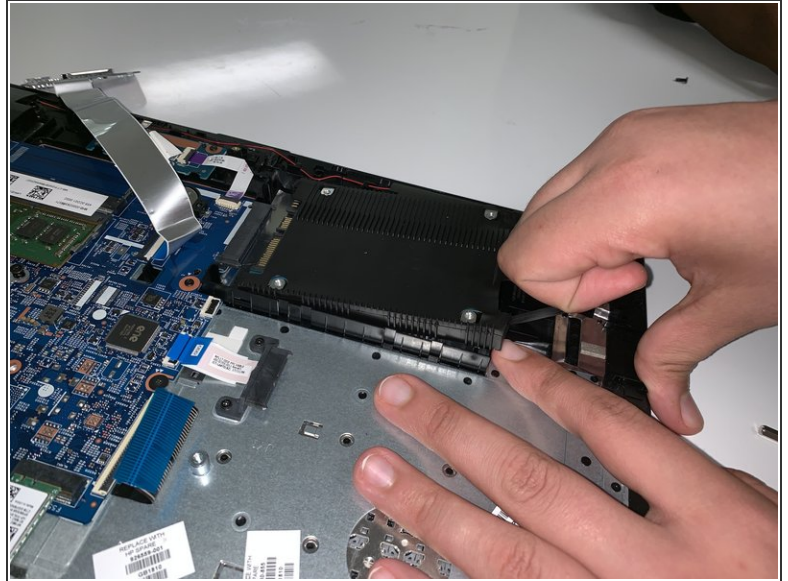

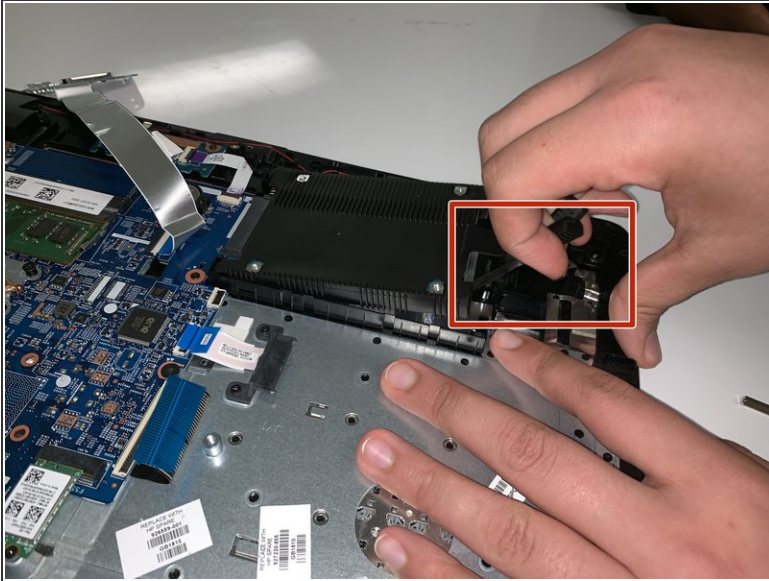

⚠ You will need to use force to pry it open.

Step 6 — Hard Drive

- Remove screw (7.51mm) on USB port with "Phillips 0 Screwdriver".
- Lift the USB port over and away from hard drive.

Step 7

- Lift rubber black tabs located on the hard drive upwards.
- Disconnect hard drive from motherboard by pulling towards you.

To reassemble your device, follow these instructions in reverse order.
