Step 1 — Back Panel

- Using a Torx T4 screwdriver, remove the four 5 mm screws on the back panel.

Step 2

- Insert the tip of a plastic opening tool in the seam between the front and back panels.
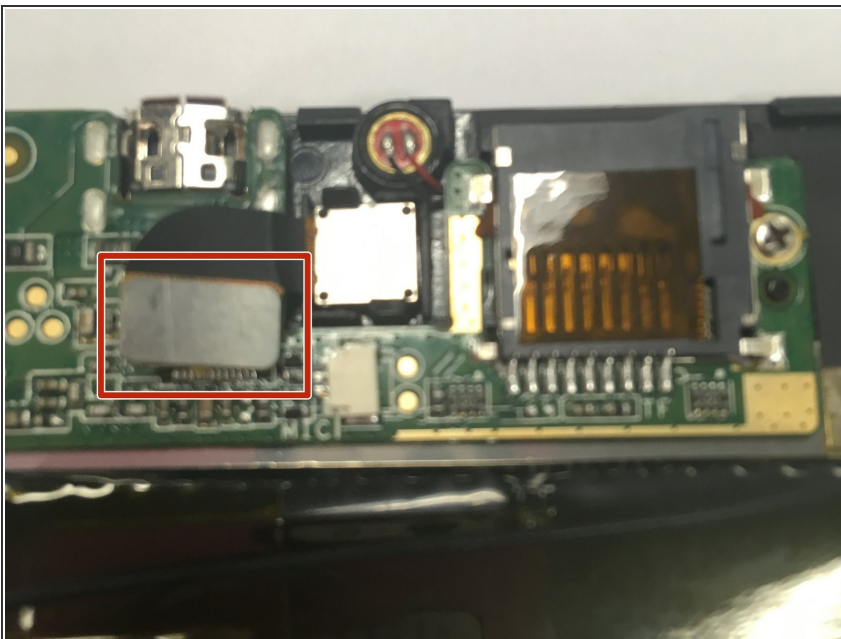

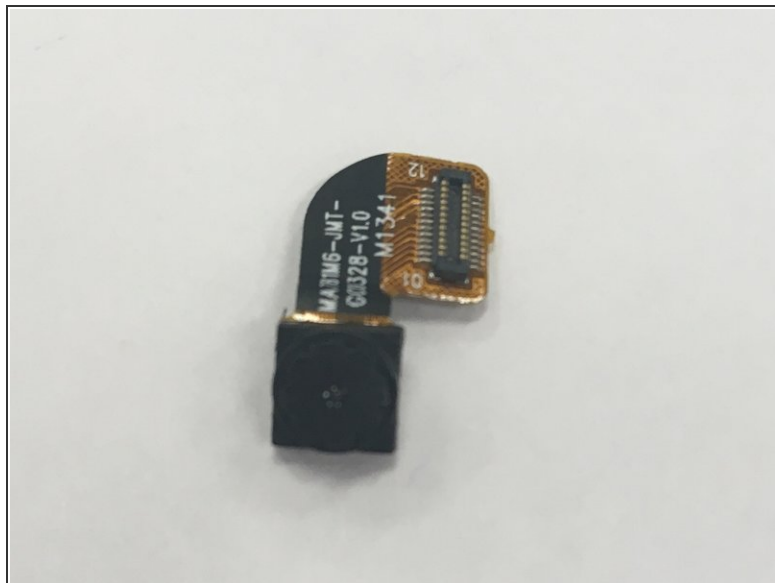

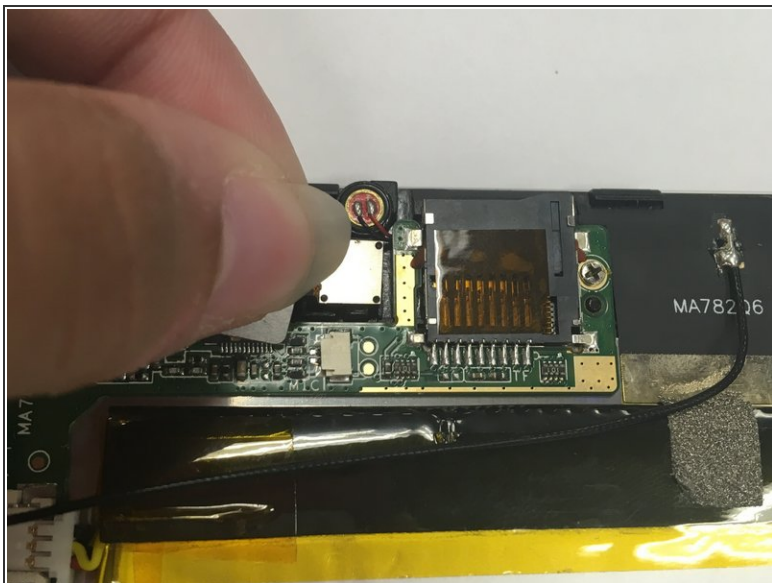

Step 3

- Slide the plastic opening tool around all edges of the device until the back panel detaches.

- Lift off the back panel.

## Step 4 — Front-Facing Camera

- Place the tip of your spudger under the edge of the press fit connector, and pry the connector straight up from its socket.

Step 5

- Lift the front-facing camera out of the tablet.

Step 6

- After the front-facing camera has been removed, the tablet should look like this.

To reassemble your device, follow these instructions in reverse order.
