Step 1 — Back Panel

- Using a Torx T4 screwdriver, remove the four 5 mm screws on the back panel.

Step 2

- Insert the tip of a plastic opening tool in the seam between the front and back panels.

Step 3

- Slide the plastic opening tool around all edges of the device until the back panel detaches.

- Lift off the back panel.

Step 4 — Power/ Volume Button Board
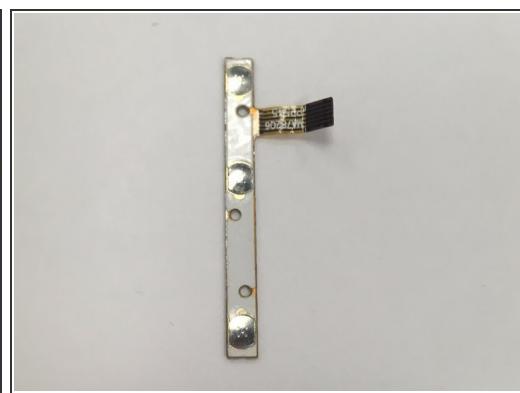

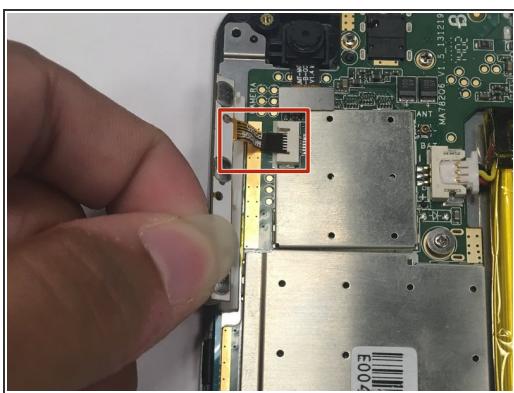

- Disconnect the power/ volume button board from the control board by pulling the ribbon cable out of the white connector. You can use tweezers or your fingers.

Step 5

- After removing the power/ volume button board, it should look like this.

To reassemble your device, follow these instructions in reverse order.
