Step 1 — Nylon Covers

- Pry up the nylon covers at the lower left and right of the display to reveal two Phillips head screws.

Step 2 — Remove The Screws. That we Just Exposed.
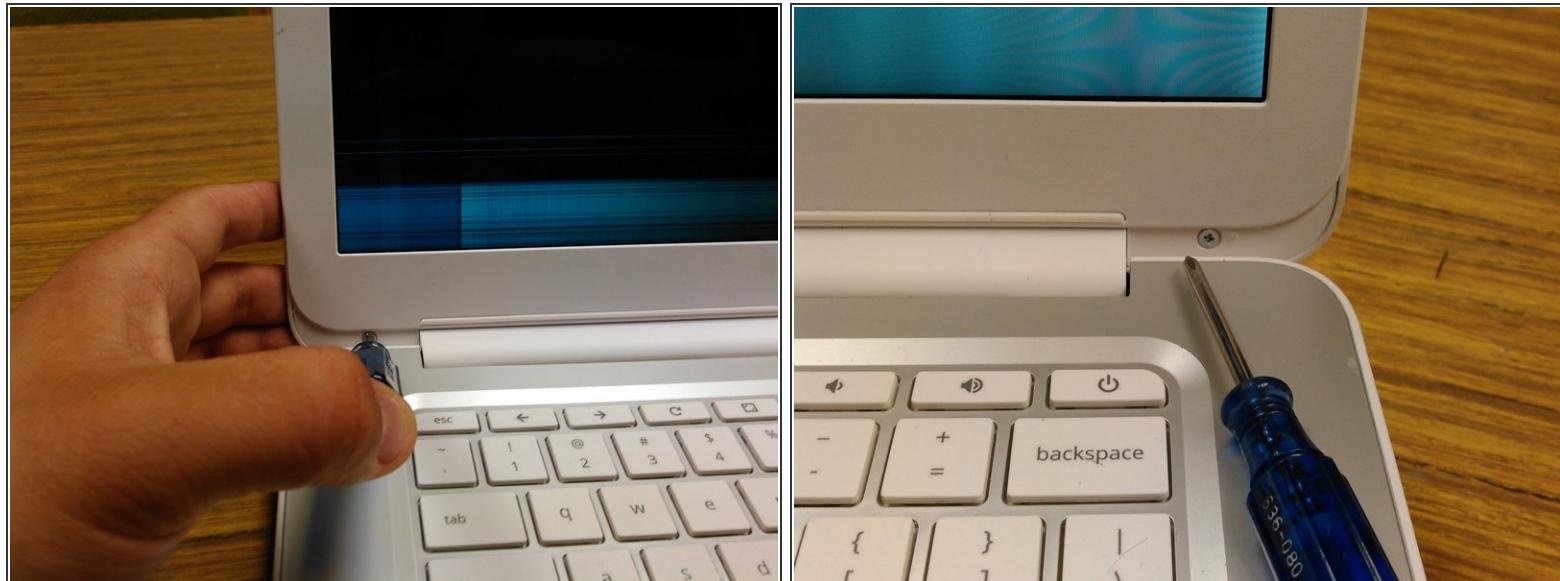

- Remove the two screws.

Step 3 — Pry & Remove Sceen
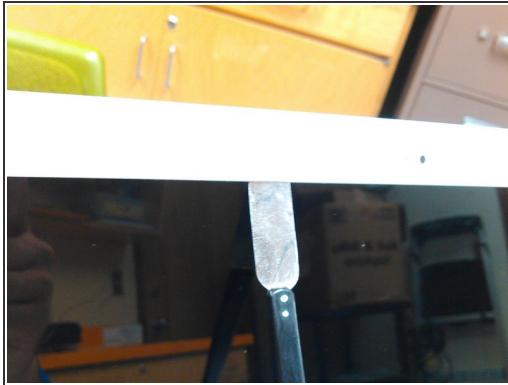

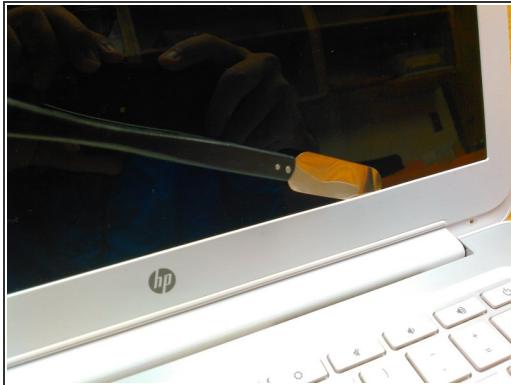

⚠️ Be careful when prying not to damage the bezel.

- Use a spudger or other pry tool to pry up the bezel from all sides.

- Once all the clips are free, pull the bezel from the bottom.

Step 4 — Remove Four Phillips Screws Holding LCD Panel

- Remove the four screws securing the display panel.

Step 5 — Disconnect Connector/Ribbon From LCD Panel

- Let the display panel rest on the keyboard.

- The highlighted area is taped to the back of the display panel. Pry up to free it.

- ⚠ Be careful not to damage the connector—pull it back gently to disconnect.

To reassemble your device, follow these instructions in reverse order.
