INTRODUCTION

The main function of this guide is to help provide a step-by-step replacement guide into replacing the battery for the HP Compaq Presario V5350NR device. Be sure that you have referenced the troubleshooting page in case that this might not be the problem that you might have.

Step 1 — Battery

- A switch is located below the battery, take your finger and push it over to the left.
- ⓘ The instruction to push the latch to the left is only relevant to the first image. The second image, which was included to provide a clearer image of said latch, would have the latch pushed to the right.
- After this the battery should pop up and be dislodged

Step 2

- Remove the battery from its socket.

To reassemble your device, follow these instructions in reverse order.
