Step 1 — RAM

- Remove battery using this guide here.

Step 2

- Unscrew 2 Phillips head screws, lift slightly up and out to remove hard drive cover.

Step 3

- ● Remove the three Phillips screws from the back plate. Pull slightly up and out to remove the plate.

- ⓘ These screws are also marked with a small RAM icon.

Step 4

- ● Gently push out the small tabs on either side.

- ● The RAM should pop up and easily be taken out from there.

To reassemble your device, follow these instructions in reverse order.
