TOOLS:

- [Phillips #1 Screwdriver](#) (1)
- [Metal Spudger](#) (1)

Step 1 — Battery

 Turn the power off and disconnect all cables and cords from the laptop.

- Place the computer on its top on a flat surface with the hinges facing away from you.

Step 2

- Slide the battery release latch to the left which is located on the right-hand side of the battery.

Step 3

- Tilt the battery away from you and lift out.

Step 4 — Service Cover

- Using a Phillips #01 screwdriver, remove the Phillips PM2.5×5.5 screw on the service cover.
- ⓘ This screw does not come out of the service cover completely once loosened.

Step 5

- Slide the service cover toward the front of the laptop.
- Lift the service cover to remove it from the laptop.

Step 6 — Optical Disc Drive

- Remove the Phillips PM2.5×4.0 screw that attaches the optical drive to the laptop.

Step 7

- Press the tab with a metal spudger that is located next to the screw to release the optical drive.

Step 8

- Slide the disk drive out of the laptop.

To reassemble your device, follow these instructions in reverse order.
