

# HP Envy x360 m6-aq103dx Hard drive Replacement

How to replace the hard drive in your HP Envy x360 m6-aq103dx.

Written By: Jordan Eremeyeff

## INTRODUCTION

Is the hard drive on your HP Envy x360 m6-aq103dx acting up or not working correctly? Follow this simple guide to replace the hard drive. You'll need a plastic opening tool and a Phillips Head #1 screwdriver.

### TOOLS:

- Spudger (1)
- T5 Torx Screwdriver (1)
- iFixit Opening Tools (1)
- Phillips #1 Screwdriver (1)

### PARTS:

- 1 TB SSD / Upgrade Bundle (1)
- 500 GB SSD / Upgrade Bundle (1)
- 250 GB SSD / Upgrade Bundle (1)
- 2 TB SSD / Upgrade Bundle (1)

## Step 1 — Bottom Cover

- Flip the laptop over to expose the underside.
- Remove the two grip pads with blue plastic opening tool by inserting the tool between the laptop and the pads and slowly lifting up.

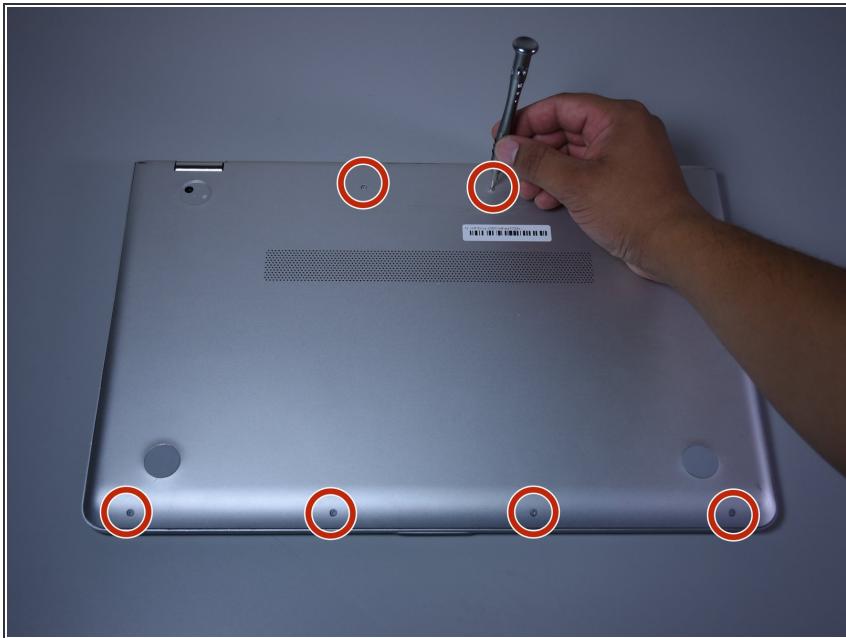

**i** The grip pads are tacky, remove slowly to avoid separating the adhesive.

## Step 2

- Remove the two 8 mm Phillips Head screws that were under the grip pads using a Phillip's Head 1 Screwdriver.

## Step 3

- Remove the six 5 mm Torx screws using a T5 Torx Screwdriver.

## Step 4

- Use the nylon spudger to pop off the bottom cover by inserting it into the heat vent and twisting to the left or right.

**(i)** You may hear a slight clicking or popping, but that is normal.

## Step 5 — Hard Drive

- Disconnect the ribbon cable with the purple tag by flipping the black tab with the plastic opening tool.
- Disconnect the ribbon cable by gently pulling it away from the connector with your fingers.

## Step 6

- Remove the two Phillips head screws (5 mm) using the Phillip's head #1 screwdriver.
- Use your hands to lift the hard drive up and remove it.

To reassemble your device, follow these instructions in reverse order.
